Wrestling and Boxing Bouts Well Attended

FIRST TOURNAMENT UNDER AUSPICES OF Y.M.C. PROVES MOST SUSSECCFUL — GOOD EXHIBITION PUT UP BY LOCAL TALENT—OFFICIALS PROVE EFFICIENT

The boxing tournament put on in the Y.M.C. hall under the auspices of the local club, was in every way a great success. There was a good attendance, and nothing but praise for the tournament was heard on all sides.

Some very good boxing was exhibited by the contestants. The two bouts between A. Hoslen and C. Johnson, 55 pounds, and R. Walker and L Cockerell, 53 pounds, created much interest. These midgets put up some excellent boxing considering their age. Credit must also be given to the other young contestants who participated in the evening's program. Some of these boys are evident comers, and when they develop Redcliff ought to have some really good boxers.

The older contestants exhibited science and skill, and are a credit to the town. With a few more tournaments such as this Redcliff ought to be able to produce some good mitt artists who will be able to put up a good argument enywhere.

Much praise is due to the Y.M.C. for the manner in which the tournament was conducted. Each event went on without a hitch, and as soon as one bout was over the contestants for the next were ready.

The wrestling events also proved to be interesting, and the contestants showed a considerable amount of skill.

The following is a list of events:

BOXING.

C. Johnson, 55; A. Hoslen, 55. No decision.

R. Walker, 53 L. Cockerell, 53. No decision.

C. Jacobson vs. S. Pickering. No decision.

James Waters, 80; E. Johnson, 83 No decision.

S. Cockerell, 88; C. Walker, 84. This bout was stopped in the second round owing to Walker hurting his back on the ropes.

W. Waters, 130; J. Kerr, 130. No decision.

W. Rutherford, 108; A. Horne, 123 Rutherford declared the winner.

D. Kerr, 125; J. Jacobson, 129. No decision.

J. Podesta, 149; G. Horne, 150. Decision given to Podesta.

K. Horne, 154; R. Reynan, 157. Decision given to Horne.

W. Waters vs. W. Hearne. Stopped in second round, Hearne hurting his wrist.

W. Horne, 169; E. Wilkie, 166. Decision won by Horne.

A comic bout between A. Gray and G. Moses caused much amusement to the audience.

WRESTLING.

P. McDermid, 137; W. Pickering, 131 Won by Pickering in first minute.

C. Nelson, 152; D. McDermid, 152. Won by Nelson in four minutes.

E. Womersley, 131; R. Pickering 131. Womersley won in 2½ minutes.

F. Canty acted as referee for the boxing and F. Jones for the wrestling. The timekeepers were C. T. Hall and F. H. Courtnell, and D. McLachlan and D. Kerr acted as judges. The announcements were made by Ben Blatchford. These officials performed their duties to the satisfaction of all.

Says Shipping System Is Centralized Combine

"The whole machinery lends itself to control, centralization and combine," asserted H. J. Symington, K.C. counsel for the crown, who continued his arguments before the grain rate commission yesterday afternoon. Dealing at length with the Standard Shipping Co., which he declared controlled space on the Canada Steamship Lines, he said that this company could grant space or refuse it, divert it to a particular port, could hold space for a shipper, could even create a con-question should it so desire. This company, he claimed, had all the machinery necessary for a combine.

There was discrimination in favor of American shippers against Canadian shippers and ports, Mr. Symington asserted.

Lower rates were given to American shippers last summer as compared with those granted to Canadians, he insisted. Discussing rates, he said that James Stewart, of the Maple Leaf Milling company, had told the commission that "lake rates were in the hands of two brokers, so that there was no competition." The control of insurance, he argued, was "clinched" by the contract between the brokers and the Canada Steamship lines.

QUEBEC SENATOR DEAD.

Senator Joseph Goddbout is dead in Quebec in his 73rd year. He was a member of the senate for 22 years and served in the house of commons as member for Beauce County, Quebec, for 14 years.

Bowell Forms Association For Better Herds

WILL ENFORCE LAW REGARDING SCRUB SIRES RUNNING AT LARGE—ALL INTERESTED IN BETTER STOCK ARE ASKED TO BECOME MEMBERS OF ASSOCIATION

At a largely attended meeting of the farmers of the Harvest Vale, Bowell and Breezelawn districts, held at Bowell on Saturday, March 31, it was decided to form an association for the purpose of stimulating interest in the breeding of a better class of cattle and horses, paying special attention to the question of clearing the range of the increasingly large numbers of scrub bulls and stallions which are at present running at large and doing great damage to the quality of the stock being produced in the territory.

Owing to the present financial condition of many of the farmers it was realized that it was impossible to make the change from grade to purebred bulls in every case, and it was agreed that each owner of a bull would keep him on his own premises until July 1st, and take him up again by Nov. 1st, and that all bulls not so looked after would be subject to capture as provided by the provisions of the Entire Animals Act of the Province.

There are a number of stallions two-year-old and over intesting this territory, both branded and unbranded, and it is proposed to capture these and deal with them as provided by law.

Parties having stallions of 15 months or over in age, at large in this territory, will save themselves trouble and expense by looking after their stock at once.

Every one in the territory who intends running a bull with his cattle on the range this summer, is requested to send full description of the animal, color markings, breed, age and brands, and in case of pure-breds, the registered name and number of the animal, to the secretary of the association as soon as possible, preferably by April 15th, as the drive on all the useless scrub will be out in full force after that date.

Everyone interested in better stock is requested to become a member of the association. The membership fee is twenty-five cents.

The association will be known as the Community Stock Raisers' Association of Bowell." The officers for 1923 are as follows:

President—George Dickson, Redcliff.

Vice-President—J. Haslam, Breezelawn.

Sec.-Treasurer—Joseph Darraugh, Bowell.

Any officer or member of the association will be pleased to give full information of our objects and aims to anyone interested.

Quebec Farmers To Join Council of Ag.

The Canadian Council of Agriculture, insession decided Thursday to admit the United Farmers of Quebec and the maritime provinces, upon application. The matter came up for discussion when it was proposed to form an eastern section, but the delegates who were present from Quebec, and the three maritime provinces were in favor of joining the Canadian council directly, instead of forming an eastern branch. So far as the platform of the council was concerned, the delegates of all four provinces express a willingness to subscribe to it.

This paves the way for bringing the whole of Canada, with the exception of British Columbia, under the one organization, and so far British Columbia has not shown any disposition to become a members, in view of the conflict over the tariff plank in the association's platform. The fruit men of British Columbia, who make up the strength of the United Farmer organization in that province, want protection from the tariff for the sale of their produce in the central west while the central west wants fruit admitted to Canada without tariff protection.

The Canadian Council of Agriculture decided Thursday to revise the platform, and a draft of the revision, which will be prepared by a special committee, will be submitted to the next annual meeting.

BRITISH LABOR CONDEMNS OCCUPATION OF RUHR

The Independent Labor party at a meeting in London, England, adopted a resolution condemning the Ruhr occupation and demanding the withdrawal of all foreign forces from Germany. During the discussion of the resolution, Herr Grispien, of Germany said the socialists in his country desired that in any case the British should not withdraw alone. M. Longuet, of France, asserted that, but for the split in the French socialist party, M. Poincare would not have dared to embark on "the abominable Ruhr advanture." He had strong hopes that next year's election would not only destroy M. Poincare's majority but double the Socialist representation in parliament and materially alter "the present tendency of the French imperialism."

TO HOLD RECEPTION FOR CANADIAN CATTLE

Glasgow corporation is extending an official reception to the first shipment of Canadian cattle received since the lifting of the embargo.

Invitations to attend the landing have been broadcast by the market committee. The committee is hoping that the shipment, which is now nearing Glasgow, will be the first to arrive in Great Britain.

Critics are unanimous in the ofinion that the new trade will have a very slight, if any, effect on meat prices for a considerable time.

Senior Footballers Reorganized For Coming Season

OFFICERS ARE ELECTED AND SUPPORTERS ARE ENTHUSIASTIC OVER PROSPECTS FOR THE COMING SEASON — FIXTURE LIST WILL BE MUCH LARGER

A meeting was held last Friday evening for the purpose of organizing the senior football club in preparation for the coming season. There was a good crowd in attendance, and there was considerable enthusiasm over the prospects for the coming season. The chief business of the evening was the election of officers, which resulted as follows:

President—D. Kerr.
Vice-President—J. Osgood.
Sec.-Treas.—T. Balmer.
Executive Committee—H. Champ, B. Blatchford, J. Waters, J. Stratton, R. Everett.
Trainer—W. Watson.

Formal application has been made to the Medicine Hat-Redcliff Association, and the club will take part in the competitions as in previous seasons.

While the club will have to rely to a considerable extent on the good old stand-bys of previous seasons, it is anticipated that some new faces will be seen on the line-up, and that Redcliff will uphold their name of being one of the hardest teams to beat in this district.

In connection with the association it may be mentioned that there will be an additional trophy up for competition this season. This will be known as the "Five Roses" trophy, and has been donated by the Lake of the Woods Milling Co. The plans outlined at present for this trophy will mean an additional five games will be played in Redcliff. This should fill in quite a lot of vacant dates, and also tend to keep the players in better shape by not having to wait so long between matches.

A general meeting of the club will be held on Sunday afternoon next at three o'clock, when further plans will be discussed for getting the club off to a successful start.

As soon as possible the players will be called on to turn out for practice, and it is anticipated there will be a friendly game or two before the boys launch out on their cup hunting jaunt.

Will Call Meeting Western Interests

Believing that conditions detrimently affecting agriculture in western Canada can be materially improved by conferences between commercial and agricultural interests, where a frank discussion of present day problems would be undertaken on a business basis, the Canadian Council of Agriculture has decided to try and revive these meetings that were held in past years.

This was the statement made yesterday by C. Rice-Jones, vice-president and general manager of the United Grain Growers' Co., Ltd., who spent the day in Montreal.

"It goes without saying that these meetings would be aside of politics; would not to erate any trivialities, and would forbid anything except a frank and business-like discussion of present day problems," Mr. Rice-Jones declared.

Denying that the "farmers want something for nothing," Mr. Rice-Jones fafored the idea of long term loans—preferably organized by private enterprise rather than the government—as a means of helping the farmers, "because agriculture will never be on a satisfactory basis until the farmer can secure loans on long terms in the same manner as a business organization obtains money by selling bonds."

ALBERTA TO SHIP SOME CATTLE FOR EXPERIMENT

Immediately after the British embargo is removed on Canadian live cattle on April 1 this year, the Provincial Department of Agriculture will send a trainload of specially fed steers across the Atlantic to ascertain what conditions will have to be met in such shipments, and what can be realized in the way of profits in exportations of this nature to the British market.

An ad. in the Review will reach the people you want to get in touch with.

Ottawa Would Extend Wheat Bd. Legislation

SASKATCHEWAN AND ALBERTA PREMIERS NOTIFIED TO THIS EFFECT — NOT KNOWN YET WHAT MANITOBA WILL DO

Both Premier Greenfield and Premier Dunning have received notification from the Dominion Minister of Commerce, Hon. J. A. Robb, that the federal government is taking the necessary steps for the extension of the Dominion wheat board legislation for another year, so that Alberta, Saskatchewan and possibly Manitoba, may engage in a marketing system for this year's wheat crop.

When asked Saturday morning as to the probability of Manitoba forming the third party to the agreement Premier Greenfield could not say anything, merely stating that this question would have to be answered by Premier Bracken, of that province

Premier Greenfield expressed the hope that Manitoba would be able to secure the necessary legislation this session, since much of the success of a scheme depends upon Manitoba's co-operation.

The premier was also silent on the matter of the appointment of a chairman for the proposed wheat board.

BRITISH SETTLERS ARE ON THEIR WAY WEST

The largest party of British settlers to arrive since the war were in Winnipeg last Monday en route west. The contingent numbered 400 and nearly all of them will take up different types of farming operations, some locating themselves, others being hired by farmers already established, and still others, notably a party of 17 girls, will continue their way west.

Local Juniors Lose To Washers In a Well Played Game

Boys Put Up Great Game Considering Lack of Practice—Junior Football Will Make Great Strides This Year.

Whatever may be the result of the competitions in the junior football section this year, it was plain to see by the game on Good Friday afternoon that there will be some rare struggles for the coveted honor, and once the boys get into shape, the games in this section will show a big advance on those played last year.

Considering that the Redcliff and Washers have had little or no practice yet this year, the game between these two teams last Friday afternoon was most interesting, and was keenly contested from start to finish. The Washers had the upper hand in the scoring of goals, securing one in the first two minutes, which naturally put them on good terms with themselves. The local boys tried hard to equalize matters in this half, and Houver was unfortunate in not having at least two goals to his credit, but try as they would the locals found the Washers' backs and goalie a bit too good for them.

At the beginning of the second half the Washers for a time penned the local boys in, without however being able to add to their lead. Some good movements were made by both sets of forwards, but the home boys made the mistake of playing too much to the left wing, instead of varied their attack, which tactics enabled the Washers to concentrate their defence on that part of the homesters' attack. A nice run by the Washers' forwards and a timely pass to their outside right resulted in that player notching goal number two for his side. This only made the locals play harder, and a shot was put in to the Washers' goalie which he could not clear, and Houver rushing up threw himself at the ball, which found a resting place in the net.

Criticism is out of place owing to the lack of condition of the boys, and we can only reiterate that on the display served up last week that junior football should come along by leaps and bounds during the coming season, and some exciting games should be witnessed before the destination of the trophies is settled.

Florida Sends Bouquet To Royal Wedding

Fully four thousand people attende dthe exercises yesterday afternoon at 4 o'clock in front of the band shell at Plant Park, held under the auspices of the Canadian Club of Tampa, in connection with the exhibition of the huge bouquet of Temple orange blossoms to be sent to Lady Elizabeth Bowes-Lyon, who is soon to become the bride of the Duke of York, second son of the King of England. The bouquet is four feet long and twenty inches wide, containing three bushels of orange blossoms, with Easter lillies, and is tastefully tied with purple and white ribbons. The bouquet was made by the Knull Floral Company—Tampa Florida, Tribune.

DIRECTOR OF KRUPP WORKS ARRESTED

Four directors of the Krupp works were arrested by the French military authorities on charges of inciting the attack by the German workmen on the troops Saturday, which culminated in the killing of nine Germans and the wounding of 34 others.

The casualties occurred when a French lieutenant with elevn men went to the Krupp works to requisition motor trucks for the French army. There were only a few cars in the garage at the time, as it appears that the Krupp authorities had a previous intimation that the requisitioning was about to be carried out, and removed some of them.

Re-opening Of School Not Yet Decided Upon

BEFORE RE-OPENING BOARD WILL LIKELY CUT DOWN THE STAFF AND ABOLISH HIGH SCHOOL—F. H. COURTNELL RESIGNS AS SEC.-TREAS.

Although the School Board has been meeting almost daily for the past week in an endeavor to devise some way of getting the school open again the situation is not yet solved, nor can the Board give any definite information as to when they will be able to open up again.

A joint meeting of the Town Council and Board was also held to discuss the situation without any success. The Board, however, is still strenuously endeavoring to evolve some scheme whereby the school may be in operation again as soon as possible. They have come to the conclusion that before opening up the school again it will be necessary to reduce the teaching staff in an effort to keep the expenditures within the receipts. This will be done by cutting out the high school and probably the primary grade. Then it is the intention to try and get a teaching staff at a much lower rate of salary than was paid the previous staff. Just when school will re-open, therefore, will depend largely on how soon the Board can secure a staff at the prices they are ready to pay.

The financing of th eschool after the staff is secured is another question. We understand the Board still has hopes of securing sufficient to keep the school going till the end of the present term at least.

At present it looks as though the children were in for a few more days holidays.

Parents with children in the high school are already making arrangements to send them to other points after the Easter vacation.

At a special meeting of the Board held Tuesday afternoon, F. H. Courtnell tendered his resignation as secretary-treasurer of the Board, and C. D. Scott was appointed to fill the vacancy.

Europe Suffering From Overflow of Women

A correspondent of the Calagry Albertan writing from London, says:

Nearly 20,000,000 girls and women in Europe today are doomed to die old maids.

They are sentenced to no husband, no home, no motherhood.

It's a situation without precedent in history. It's the biggest human interest story in the world.

Yet governments close their eyes to it, statesmen and politicians ignore it, reporters and authors avoid it. It's too vast in all its aspects—political, economic and moral—for them to grapple with.

There are 20,000,000 more females than males in Europe today because of the vagaries of the birthrate, the survival of more girl infants than boy babies, the decimation of men by war and the heavier toll of males taken by famine and pestilence.

These millions of so-called superfluous women are creating questions involving everything of fundamental importance; the sanctity and preservation of the home, the social and political equality of women, work and wages, and the next generation's heritage of good or evil. In the British isles the superfluous women number 2,000,000. In Russia, 8,000,000. Their 10,000,000 sisters are divided throughout the other countries. Eligible young men are deterred from marrying by lack of work, cuts in wages, scarcity of houses, higher cost of necessities and threats of new wars.

Social Evening At Harvest Vale

A social evening and dance was held at Harvest Vale on Thursday evening last, when a large number attended from Medicine Hat, Bowell, Box Springs and Redcliff. It was one of the most successful evenings we have had this winter, in consequence everyone had a very enjoyable time. Mr. Reg. Cann and Mr. Mckinley kindly assisted our orchestra with several selections, and their assistance was greatly appreciated. Our next social evening will be after seeding, when we hope to have as large an attendance as at this time.

Wants Mutual Sympathy for East and West

THIS IS MOST DESIRABLE THING JUST NOW SAYS H. W. WOOD AT TORONTO MEETING — IF NOT THEY WILL DRIFT APART

"I think that getting together and working together with mutual sympathy is the most desirable thing just now," stated H. W. Wood, president of the United Farmers of Alberta, regarding problems affecting his province in particular and the west in general. "If the east and west refuse to get together," maintained Mr. Wood, "then nothing can keep them from drifting apart."

Mr. Wood claimed there was much dissatisfaction throughout the prairie provinces in regard to treatment by the east and that for the first time in his experience one heard some talk of secession. There is very real resentment at the general attitude of the people of the east, Mr. Wood said. "We object to their attitude of seeming indifference, their unjust criticism."

Mr. Wood had no concrete solution for the present problem. Immigration, he maintained, would not help, but would rather aggravate the situation. "Prairie farmers do not object to immigration of more farmers under normal circumstances, but they oppose the bringing in of farmers at a cost of three to five hundred dollars per family to settle on the land when the farmers already on the ground cannot make a living," he stated empratically.

A central selling agency for wheat would also help to adjust prices in the west, but this would not prove a complete cure, he said. The solution of this problem must be worked out by the whole people of the whole country.

Noted Visitors Show Interest In Boys & Girls

SIR ROBERT AND LADY BADEN-POWELL SPEAK OF WORK TO BE DONE IN BOY SCOUTS AND GIRL GUIDES — MAKES FOR A BETTER CITIZENSHIP

The advantage of taking the boy and the girl at an impressionable age and imbuing them with ideals and ambitions which make for honored citizenship, were dwelt upon by Sir Robert and Lady Baden-Powell at Ottawa Saturday, when the ywere guests of honor at a joint luncheon of the Woman's Canadian club and the Canadian club of Ottawa.

Lady Baden Powell spoke of the Girl Guides who, she said, had a world membership today of 400,000.

Since there were many more girls in the world than boys, there was vast work for women in taking these wives and mothers of the future and showing a vision of usefulness where they thought of others rather than themselves. In training girls the great need was to interest them in useful activities in order to counteract the drifting habit. The Society of Girl Guides, said Lady Baden Powell, had in mind several great principles—honor and resourcefulness; developing the girls' inherent talents; health and hygiene—health of mind and health of body; personal service for the rest of the community.

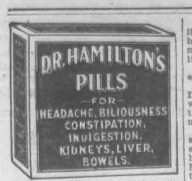
An appreciation of honor, truthfulness and decency, said Sir Robert Baden Powell, was at the root of the great Boy Scout movement—it was a movement which appealed to boys of all classes. As a matter of fact the Boy Scout movement was essentially that which made for good citizenship in boys of all ages, young as well as old. Many of the boys who would come to aCnada later on would be found to be finer Canadians, because, through association through the Boy Scout movement, they had come to appreciate the value of service and of honorable intercourse between man and man. Some of these boys were destined to become noted figures in Canada's future history, and therefore it was most essential that they should come to Canada imbued with the finest ideals.

Y.M.C. Meetings For Next Sunday

At three o'clock next Sunday afternoon there will be a meeting in the Y.M.C. for the purpose of organizing a baseball club for the coming season. All interested in the formation of such a club are urgently requested to attend. There will also be a special meeting of the Y.M.C. club at the same time and place.

Officers and members of the Y.M.C. wish to thank all officials and entrants for the tournament held last Thursday evening for their services rendered, and for helping to make the event such a success.

Mildred Underwood, aged 3, was burned to death at Kitchener, Ont., Friday night, when her clothing ignited on a coal stove in her home.



HIDDEN GOLD

— BY —

WILDER ANTHONY

Canadian Rights Arranged With Publishers, F. D. Goodchild Co., 266 King St. West, Toronto.

(Continued)

Wade nodded slowly.

"That's the idea, but I'm afraid we can't do it, Lem. I haven't a doubt but that Moran is mixed up in the killing, but I hardly believe Rexhill is. Anyhow, they've probably covered their tracks so well that we'll never be able to connect them with it."

"Oh, I don't know. You can't always tell what time'll bring to light." Trowbridge lowered his voice. "What's your idea about Santry? Do you want help there?"

"No." Wade spoke with equal caution. "I believe I can manage all right alone. The Sheriff will probably be looking for us to rush the jail, but he won't expect me to come alone. Bat Lewis goes on duty as the relief, about nine o'clock. I mean to beat him to it, and if the Sheriff opens up for me I'll be away with Santry before Bat appears. But I must get some sleep, Lem."

The two men arose.

"Well, good luck to you, Gordon." Trowbridge slapped his friend on the shoulder, and they separated.

"Frank, can you let me have a bed?" Wade asked of the hotel proprietor, a freckled Irishman.

"Sure; as many as you want."

"One will do, Frank; and another thing," the ranchman said guardedly. "I'll need an extra horse tonight, and I don't want to be seen with him until I need him. Can you have him tied behind the school-house a little before nine o'clock?"

"You bet I can!" The Irishman slowly dropped an eyelid, for the schoolhouse was close by the jail.

Wade tumbled into the bed provided for him and slept like a log, having that happy faculty of the healthy man, of being able to sleep when his body needed it, no matter what impended against the hour of awakening.

When he did wake up, the afternoon was well advanced, and after another hearty meal he walked over to the Purnells' to pass the time until it was late enough for him to get to work.

"Now, Gordon will tell you I'm right," Mrs. Purnell proclaimed triumphantly, when the young man entered the cottage. "I want Dorothy to go with me to call on Miss Rexhill, and she doesn't want to go. The idea! When Miss Rexhill was nice enough to call on us first."

Mrs. Purnell set much store upon her manners, as the little Michigan town where she was born understood good breeding, and she had not been at all annoyed by Helen Rexhill's patronage, which had so displeased Wade. To her mind the Rexhills were very great people, and great people were to be expected to bear themselves in lofty fashion. Dorothy had inherited her democracy from her father and not from her mother, who, indeed, would have been disappointed if Helen Rexhill appeared any less than the exalted personage she imagined herself to be.

"Oh, I'd like to meet her well enough, only . . ." Dorothy stopped, unwilling to say before Wade that she did not consider the Rexhills sufficiently good friends of his, in the light of recent developments, for them to be friends of hers.

"Of course, go," he broke in heartily. "She's not responsible for what her father does in the way of business, and I reckon she'd think it funny if you didn't call."

"There now!" Mrs. Purnell exclaimed triumphantly.

"All right, I'll go." In her heart Dorothy was curious to meet the other woman and gauge her powers of attraction. "We'll go to-morrow, mother."

Quite satisfied, Mrs. Purnell made some excuse to leave them together, as she usually did, for her mother heart had traveled farther along the Road to To-morrow than her daughter's fancy. She secretly hoped that the young cattleman would some day declare his love for Dorothy and ask for her hand in marriage.

In reply to the girl's anxious questions Wade told her of what had happened since their meeting on the trail, as they sat together on the porch of the little cottage. She was wearing a plain dress of green gingham, which, somehow, suggested to him the freshness of lettuce. She laughed a little when he told her of that and called him foolish, though the smile that showed a dimple in her chin belied her words.

"Then the posse is still at the ranch?" she asked.

"I think so. If they are, we are going to run them off to-morrow morning, or perhaps to-night. I've had enough of this nonsense and I mean to meet Moran halfway from now on."

"Yes, I suppose you must," she admitted reluctantly. "But do be careful, Gordon."

"As careful as I can be under the circumstances," he said cheerfully, and told her that his chief purpose in coming to see her was to thank her again for the service she had rendered him.

"Oh, you don't need to thank me for that. Do you know"—she puckered up her brows in a reflective way—"I've been thinking. It seems very strange to me that Senator Rexhill and Moran should be willing to go to such lengths merely to get hold of this land as a speculation. Doesn't it seem so to you?"

"Yes, it does, but that must be their reason."

"I'm not so sure of that, Gordon. There must be something more behind all this. That's what I have been thinking about. You remember that when Moran first came here he had an office just across the street from the present one?"

"Yes. Simon Barsdale had Moran's present office until he moved to Sheridan. You were his stenographer for a while, I remember." Wade looked at her curiously, wondering what she was drivnig at.

"Moran bought Mr. Barsdale's safe." Her voice sounded strange and unnatural. "I know the old combination. I wonder if it has been changed?"

"Lem Trowbridge was saying only this morning," said Wade thoughtfully, for he was beginning to catch her meaning, "that if we could only get proof of something crooked we might . . ."

"Well, I think we can," Dorothy interrupted.

They looked searchingly at each other in the gathering dusk, and he tried to reach the light in her eyes, and being strangely affected himself by their close proximity, he misinterpreted it. He slipped his hand over hers and once more the desire to kiss her seized him. He let go of her hand and was just putting his arm around her shoulders when, to his surprise, she appeared suddenly indignant.

"Don't!"

He was abashed, and for a moment neither said a word.

"What is the combination?" he finally asked hoarsely.

"I promised Mr. Barsdale never to tell any one." Her lips wreathed into a little smile. "I'll do it myself."

"No, you won't." Wade shook his head positively. "Do you suppose I'm going to let you steal for me? It will be bad enough to do it myself; but necessity knows no law. Well, we'll let it go for the present then. Don't you think of doing it, Dorothy. Will you promise me."

"I never promise," she said, smiling again, and ignoring her last words in womanly fashion, "but if you don't want me to . . ."

"Well, I don't," he declared firmly. "Let it rest at that. We'll probably find some other way anyhow."

She asked him then about Santry, but he evaded a direct answer beyond expressing the conviction that everything would end all right. They talked for a while of commonplaces, although nothing that he said seemed commonplace to her and nothing that she said seemed so to him. When it was fully dark he arose to go. Then she seemed a little sorry that she had not let him put his arm around her, and she leaned toward him as she had done on the trail; but he was not well versed in women's subtleties, and he failed to guess her thoughts and walked away, leaving her, as Shakespeare put it, to

That which with scorn she put away."
"Twice desire, ere it be day,.

Having mounted his horse at the livery stable, he first made sure that the extra horse was behind the schoolhouse, where he tied his own, and then walked around to the jail. On the outside, this building was a substantial log structure; within, it was divided into the Sheriff's office and sleeping room, the "bull pen," and a single narrow cell, in which Wade guessed that Santry would be locked. After examining his revolver, he slipped it into the side pocket of his coat, and walked boldly up to the jail. Then, whistling merrily, for Bat Lewis, the deputy, was a confirmed human songbird, he knocked sharply on the door with his knuckles.

"It's me—Bat," he called out, mimicking Lewis' voice, in answer to a question from within.

"You're early to-night. What's struck you?" Sheriff Thomas opened the door, and turning, left it so, for the "relief" to enter. He had half feared that an attempt would be made to liberate Santry, but had never dreamed that any one would try the thing alone. He was glad to be relieved, for a poker game at which he wanted to sit in would soon start at the Gulch Saloon.

He was the most surprised man in Wyoming, when he felt the cold muzzle of Wade's Colt boring into the nape of his neck, and heard the ranchman's stern warning to keep quiet or take the consequences. Sheriff Thomas had earned his right to his "star" by more than one exhibition of nerve, but he was too familiar with gun ethics to argue with the business end of a "45."

"Not a sound!" Outwardly cold as ice, but inwardly afire, Wade shoved the weapon against his victim's neck and marched him to the middle of the room. "I've got the upper hand Sheriff, and I intend to keep it."

"You're a damn fool, Wade." The Sheriff spoke without visible emotion and in a low tone. "You'll go up for this. Don't you realize that . . ."

"Can it!" snapped Wade, deftly disarming the officer with his free hand. "Never mind the majesty of the law and all that rot. I thought that all over before I came. Now that I've got you and drawn your teeth, you'll take orders from me. Get my foreman out of that cell and be quick about it!"

There was nothing to do but obey, which Thomas quietly did, although somewhat in fear of what Santry mighty do when at liberty. When the cell door was unlocked, the old plainsman, in a towering rage at the injustice of his incarceration, seemed inclined to choke his erstwhile jailer.

"None of that, Bill," Wade admonished curtly. "He only been a tool in this business, although he ought to know better. We'll tie him up and gag him, that's all. Rip up one of those blankets."

"I knew you'd come, boy!" The foreman's joy was almost like that of a big dog at sight of his master. "By the great horned toad, I knew it!" With his sinewy hands he tore the blanket into strips as easily as though the wool had been paper. "Now for him, drat him!"

Wade stood guard while the helpless Sheriff was trussed up and his mouth stopped by Santry, and if the ranch owner felt any compunction at the sight, he had only to think of his own men as he had seen them the night before, lying on the floor of the ranch house.

"Make a good job of it, Bill," was his only comment.

"You bet!" Santry chuckled as he drew the last of the knots tight. "That'll hold him for a-spell, I reckon. How you feel, Sheruff, purty comfortable?" The flowing end of the gag so hid the officer's features that he could express himself only with his eyes, which he batted furiously. "Course," Santry went on; in mock solicitude, "if I'd thought I mighta put a bit of sugar on that there gag, to remind you of your mammy like, but it ain't no great matter. You can put a double dose in your cawfee when you git loose."

"Come on, Bill!" Wade commanded.

"So long, Sheruff," Santry chuckled.

MOTHER OF TWIN BOYS

Tells How Lydia E. Pinkham's Vegetable Compound Relieved Her of Inflammation and Great Weakness

West St. John, N. B.—"I was in a general run-down condition following the birth of my twin boys. I had a great deal of inflammation, with pains and weakness. Finally my doctor recommended Lydia E. Pinkham's Vegetable Compound. He said that your medicine would be the only thing to build me up. I am sure he is right, for I am feeling much better and am gaining in weight, having gone down to ninety-three pounds. I was in bed for over a month, but am up again now. I have recommended the Vegetable Compound to my friends and give you permission to use my letter."—Mrs. ELMER A. RITCHIE, 82 Rodney St., West St. John, N. B.

There are many women who find their household duties almost unbearable owing to some weakness or derangement. The trouble may be slight, yet cause such annoying symptoms as dragging pains, weakness and a run-down feeling.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for such conditions. It has in many cases relieved those symptoms by removing the cause of them. Mrs. Ritchie's experience is but one of many.

You might be interested in reading Mrs. Pinkham's Private Text-Book upon the "Ailments of Women." You can get a copy free by writing the Lydia E. Pinkham Medicine Co., Cobourg, Ontario.

Livestock Improvement Trains

Under the auspices of the railways, the Provincial Government, and livestock associations of the province, two livestock improvement trains, similar to those which toured the province last year, will again be operated in Manitoba during the coming summer.

KIDNEY TROUBLE?

The Kidneys are the Blood Filters—When they Weaken and Stop Up, the System Becomes Overloaded with Uric Acid

Niagara Falls, Ont.—"I have used nearly all of Dr. Pierce's medicines and take great pleasure in giving them a boost. The Anuric Tablets are the greatest benefit to mankind. I was suffering with kidney trouble and was rejected by different insurance companies. Today I am holding three good policies. All I ask the readers of this is to give the Anuric Tablets a trial, and become a life user in the future."—William Dempsey, 32 Bridge St.

HEALTH IS YOUR MOST VALUABLE ASSET

Montreal, Que.—"I cannot praise Dr. Pierce's Anuric enough for what it has done for me. For three months I was under the doctor's care and got no better. I was always complaining of my kidneys. Finally I made up my mind to try Dr. Pierce's Anuric Tablets. I took two packages and don't complain any more. I have gained in weight and am still gaining. My appetite is great and sleep has come to me. That is what the Anuric Tablets have done for me. I truly recommend them to those who are suffering from kidney ailments the way I did. They are mighty good, though not expensive; easy to buy, but hard to beat." —T. A. Brown, 415 Dorchester St., W.

Ask you nearest druggist for Anuric in tablet form, or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ontario, for trial pkg. and write for free medical advice.

Want Strict Flour Inspection

Steps Being Taken In Vancouver to Assure Grade

Owing to the very great increase in exports of Canadian flour from Vancouver and the promise of a pronounced and permanent development of the trade in the immediate future, the flour interests of the city are taking steps to create a strict inspection in order to assure the maintenance of this product in its premier position in foreign markets. During the last year flour exports to the United Kingdom and the Orient increased 400 and 500 per cent., respectively. In 1921 the Oriental market took 68,032 barrels, while in 1922 it took 515,480 barrels. The United Kingdom took 30,196 barrels in 1921 and 163,081 barrels in 1922.

Heals Inflamed Nostrils, Stops Catarrhal Discharge, Relieves Colds Quickly

You'll be pleasantly surprised at the quick action Catarrhozone has upon Catarrhal conditions in the nose or throat. It is so soothing, so healing, so agreeable to use, so safe and reliable that thousands praise it and use it every day. No nasty medicine to take—you just breathe in the balsamic vapor, the healing essences of Catarrhozone and feel better at once. Catarrhozone is breathed through the inhaler into every air cell in the lungs, into every air passage in the throat and nostrils. No matter where the cold or Catarrh is, Catarrhozone will reach it. You can keep free from coughs, colds, bronchitis and the like by using Catarrhozone. Two months' treatment One Dollar, small size 50c. Dealers everywhere, or the Catarrhozone Co., Montreal.

A British Fire Fighter

Can Throw 24 Jets to Height of 200 Feet

A very interesting type of vessel was recently built in Great Britain for use abroad as a fire and salvage boat and also on occasion as a tug and water tender. This vessel is over one hundred feet long and is driven by two triple-expansion engines giving a speed of over 13 knots—which is about two knots higher than the contract speed. The boilers are oil-fired and there are two salvage and fire pumps with a total capacity of 4,000 gallons per minute. A powerful single jet 3½ in. in diameter can be discharged to a height of about 200 feet, while no fewer than 24 jets can be thrown simultaneously if desired. The vessel is constructed for sea going and is proceeding under her own steam to her destination in the east.

STOMACH MISERY, GAS, INDIGESTION

"Pape's Diapepsin" Corrects Sour, Upset Stomachs at Once

"Pape's Diapepsin" is the quickest, surest relief for indigestion, gases, flatulence, heartburn, sourness, fermentation or stomach distress caused by acidity. A few tablets give almost immediate stomach relief. Correct your stomach and digestion now for a few cents. Druggists sell millions of packages.

Napoleon's Carriage

Famous Carriage Presented to German City by English Owners

We so often see pictures of Napoleon on foot and on horseback that it is difficult to imagine him directing his armies from a carriage. But the ownership of the travelling carriage in which he did much of his campaigning has just been contested by three nations.

It was left by Napoleon on the battlefield of Leipzig, where he was crushingly defeated by the combined Prussians, Russians and Austrians, and it fell into the hands of the famous Prussian Field-Marshal, Blucher. Blucher left it to his descendants, who sent it to the family estates in Bohemia.

It is not surprising that France should have claimed the carriage after the war; but it was also claimed by English descendants of Blucher, and it has just been awarded to them by the Supreme Court of Leipzig.

But, curiously enough, its new owners have decided not to bring it to England, but have presented it to the city of Breslau; so that Germany will keep her trophy, after all.

Sounding Device

A device has been recently invented for measuring ocean depths. It is done by means of sound reflection, and so accurate is this instrument that seldom is there an error of more than a foot even when a ship is travelling at full speed. This is considered one of the most important maritime inventions of years.

Minard's Liniment for Coughs and Colds

"YOUR TEETH"

DENTAL DEFECTS

By Rea Proctor McGee, M.D., D.D.S., Pittsburgh, Pa.

The examination of school children from the standpoint of health always reveals the most alarming percentage of dental defects. In this country the uniform percentage of children with decayed teeth is ninety-eight out of every hundred.

Dental defects constitute the most numerous of all defects of the body that are found during medical inspection.

The children who are in greatest need of attention to the teeth are found among those from four to eight years of age.

The percentage greatly decreases in the older groups.

These defective teeth are responsible for many of the serious disturbances of the general health, and especially is this true of the so-called "rheumatic" affections, diseases of the heart and digestive disturbances. No system of health supervision of children can possibly be effective that does not secure the successful treatment of dental defects, or that fails to instruct parents in dental prophylaxis.

In those fortunate communities where there is a school dentist the children should be encouraged to visit his clinic. The time is coming, according to Modern Medicine, when the school dentist will be considered just as necessary a part of the school system as is the school principal himself.

In school dental work, where it is impossible, on account of a lack of facilities, to care for the teeth of all the children, then the teeth of the children of the first two or three grades should receive attention first, so that eventually the percentage of healthful mouths in the upper grades will be increased.

In these days when it has become so fashionable to distribute large gobs of money for charitable and sociological purposes, it would seem that one of the very best methods of benefiting one's fellow man would be to found, in all large communities, dental dispensaries where those people who cannot afford the services of the skilled dentist could take their children, to have their little lives made something better than one long memory of raging toothaches.

The benefits in health that have been demonstrated by the older established clinics of this type, have shown that this work is one of the most important, in the conservation of the health and the prevention of disease, that has ever been undertaken.

In communities where there are a number of orphanages and other charitable institutions that cannot afford the regular services of a dentist with a well-equipped office, it is particularly desirable to found central dental dispensaries that will take care of all of the children in these homes.

In casting about for a method to spend money for the public good, do not forget the mouth.

Silver is being recovered from the waste hypo used in developing film photographs. The Los Angeles yield averages close to $14,000 monthly.

Chest Cold? —try this method

That chest cold can be broken up—no matter how stubborn and deep-seated it may seem!

Apply Sloan's Liniment to chest and neck tonight. Its tingling, glowing warmth goes to the root of trouble. It breaks up the congested, inflamed condition. Relief quickly follows.

Get a bottle of Sloan's today. All druggists carry it. Its effectiveness will surprise you. *Made in Canada*

Sloan's Liniment—kills pain!

For rheumatism, bruises, strains, chest colds

Shipping Certified Butter

A feature of the creamery butter production report of the province of Saskatchewan, is that slightly over 56 per cent., or over 5,000,000 pounds, of the total creamery butter output of 1922, was exported under Government grade certificate. Of this amount 1,700,000 pounds were shipped direct to Great Britain, while 120,000 pounds went to the United States, and the balance to other markets.

Had An Ingenious Alibi

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

WORLD HAPPENINGS BRIEFLY TOLD

Work has started at Vancouver on the new 500,000 bushel grain elevator.

Out of the 12,502,582 children between 10 and 15 years of age in the U.S., 1,060,858, or one in every 12, are at work.

Said to have been the oldest man in the Eastern Townships, Etienne Boneau, 107 years old, died at St. Hyacinthe, Que. His youngest son is 79.

The French Ministry of Labor publishes figures showing that generally the cost of living in France is now three times as much as in 1914.

The British Columbia Government's $2,500,000 job of reclaiming and opening to settlement the rich lake-bottom lands of Sumas, in the Fraser Valley, over an area of five to 14 miles, will be completed by May 1.

The title of "royal" has been conferred by the King upon the Canadian Air Force, according to an announcement by the Department of National Defence. This service will accordingly be known in future as the Royal Canadian Air Force.

The Frankfurter Zeitung states that in 1922 Germany delivered to Jugo Slavia on account of reparations 3,983 closed railway trucks, 150 oil cisterns, 2 complete railway workshops and 331 normal-guage and 20 narrow-gauge locomotives.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Eclectric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Big Oil Refinery

The $2,500,000 refinery of the Imperial Oil, Limited, which is under construction in Calgary, will be in operation by the end of 1923, according to a reported statement by C. O. Stillman, President of the concern.

More Irrigated Land

Large Area of Irrigated Land Will be Added this Spring

Water will be available in the spring on two of the irrigation projects in Southern Alberta, namely the Lethbridge Northern and the United, according to the annual report of the Irrigation Council of the province of Alberta. Considerable work is now being done towards colonizing the surplus lands in these districts. A total of 40,000 acres of land has been listed at prices ranging from $15 to $50 an acre. The council has a mailing list of 8,000 in its colonization work, and have already received more than 400 inquiries for land. Twenty prospective settlers have been shown over the projects.

Relieved after Nine Years of Suffering

Manitoba Man Finds Secret of Health in Dodd's Kidney Pills

Mr. P. R. Boissino wants Everyone to Know what Benefit he Received from Dodd's Kidney Pills.

La Broquerie, Man.—(Special).—"Before taking Dodd's Kidney Pills I was not able to work or sleep and now I am completely relieved of my kidney trouble." These are the words of Mr. P. R. Boissino, well-known and highly respected here.

"I have suffered for nine years and tried all kinds of remedies. It was Dodd's Kidney Pills that restored me to good health. I am now able to get about on the farm, have a good appetite and sleep well."

Dodd's Kidney Pills strengthen the kidneys and put them in shape to do their full work of straining the impurities out of the blood. With pure blood there is good health all over the body.

If you have not used Dodd's Kidney Pills for kidney trouble ask your neighbors about them.

Gold Smuggled In Soap

Shopkeeper Bought Valuable Shipment At Auction

Gold has been so scarce in Austria that all sorts of devices have been tried to get the precious metal into that country, the latest being smuggling it in soap. How the project failed is told in the following incident:

A widow in Budapest, after purchasing a cake of soap from a little shop nearby, began to rub the garments in her tub. After a time she came to a surprisingly hard centre—a gold crown piece.

Without delay she returned to the shop and purchased more cakes of the wonderful soap. Every one yielded a gold piece.

She organized a pool among her neighbors with the idea of clearing the shop of that particular brand of soap. But the secret was out. The police arrived and confiscated the stock.

It was discovered that originally the consignment had been dispatched from Budapest to a merchant in Vienna. An error had occurred in the bill of lading. The soap, put off at a wayside station, was unclaimed and finally auctioned.

The entire shipment, worth £200,000, had been bought for a trifling sum by the shopkeeper.

Many Foreigners Nationalized

Men of every nationality secured status of citizens of Canada during the fiscal year ending March 31, 1922. Altogether 10,360 foreigners were naturalized. Americans with 2,206 and Russians with 2,060, led in the number of persons who became naturalized Canadians.

They relieve constipation, banish indigestion, drive out biliousness, stop dizziness, clear the complexion, put a healthy glow on the cheek and sparkle in the eye. Be sure and get the genuine.

CARTER'S LITTLE LIVER PILLS

Small Pill—Small Dose—Small Price

Canada Broadening Out

Limitless Possibilities of the Dominion Becoming More Generally Known

There is no thin strip of Ontario and Quebec separated by a desolate waste from the prairies. No longer are the prairies a narrow ribbon of land separated from British Columbia by mountains so high that freight cannot be carried over them. Instead we have Quebec pushing its settlements up the northern valleys and its industries into Labrador; Ontario extending local railways to the waters of Hudson Bay, and finding gold and silver mines on the way, at the same time creating a new Ontario towards Manitoba. Prairie lands available for culture are two or three times the breadth north and south that the despairing critics of other days supposed. British Columbia, more than any of the other provinces, is finding wealth in her northland. Farming, fishing, lumbering and mining are working their way north. In this province, in Alberta, in Manitoba, and in Ontario the cry for railways comes mainly from the north.—Vancouver Province.

HAD BAD PAINS IN HER HEART

Nerves Were Very Bad

Mrs. John Case, R. R. No. 4, St. Catharines, Ont., writes:—"I wish to say that I have been bothered very much with my heart and nerves. I doctored with two different doctors, but did not find much relief. I would have such bad pains in my heart, at times, I would be almost afraid to move or breathe, and at night I could not sleep. If the pains in my heart were gone, my nerves would be so bad I could not lie still and would only get a little sleep by being tired out. My stomach was also very bad and I could eat but very little, and then only certain things or I would have so much distress which always made by heart worse.

I had been suffering for nearly two years until one day I was talking to our druggist about the way I felt. He advised me to give Milburn's Heart and Nerve Pills a fair trial. I have now taken five boxes and am feeling so much better. I am able to do my own work, and can eat anything I wish. I cannot praise

MILBURN'S HEART AND NERVE PILLS

too highly."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

It is asserted that the existence of cancer and tuberculosis in large sea monsters has been definitely established, and that these discoveries may direct the attention of investigators of these diseases to the earlier forms of life that still exist in the sea.

A Marvellous Instrument

Machine Gives Record on Chart of Strains in Steel

To the lay mind it might seem impossible to devise any means of measuring microscopic strains in steel and other materials. There have been, however, various instruments designed in Great Britain to record strains of the most minute character—mere tremors in the material. A notable improvement in this field has recently been introduced by a leading British firm—their machine, unlike earlier types, giving a direct record on a chart of the strains and not depending upon photographs. The mechanism is driven by a clock movement, and does not need any battery or electric lamp. So sensitive is the instrument that it will register vibrations taking place at over one thousand times per second. Records are made by a pen on a tape and are examined under a simple microscope. The chief use for this instrument is in measuring the various stresses which arise in bridges when trains are crossing at various speeds.

Increase In Building

Figures recently issued by the Canadian Government Bureau of Statistics show that building permits to the value of $3,705,256 were issued in Canada during January, of this year, an increase of $772,221 compared with January, 1922, or 26 per cent. It is expected that there will be great activity in the building trades throughout Canada during the present year.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Postal Air Routes

Stefansson Predicts Mail Delivery In Arctic By Airplane

The post office department announced a short time ago that a regular mail service will be opened between Fort McMurray, in Northern Alberta, and Aklavik, on the delta of the Mackenzie River, the Canadian Arctic's newest post office and trading centre. The mails will be carried by five relays of huskies in sleighs, and the postman will be two months in the wilderness each time he makes the trip. He will sleep under the canopy of heaven, surrounded by his dogs. By day he will mush across the white spaces in a manner that Jack London made famous. But even this last bit of romantic human enterprise is threatened. Mr. Stefansson has already mapped the Arctic with polar air routes which he says will come within a few years. So the world moves on.—Winnipeg Tribune.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Wolf Dogs For Movies

Forty "huskies," or wolf dogs, passed through Edmonton recently on their way to Banff, Alberta, where they will be used by an American motion picture producing company in the filming of a number of northern pictures.

Dye Faded Wrap, Skirt, Dress In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old worn, faded things new. Even if she has never dyed before, she can put a rich, fadeless color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

Monster Sawfish Caught

A sawfish, weighing two and one-quarter tons has recently been caught in the Bay of Panama. The fish was twenty-nine feet long, and had a girth of ninteen feet.

Power From Sun's Rays

New York College Graduate Demonstrates Miniature Engine

A miniature engine, whose power was generated by the sun's rays, was successfully demonstrated in the laboratory of the college of the city of New York by Bernard Grossman, a graduate.

A parabolic copper mirror caught and focussed the rays upon a test tube of water, the heat causing steam, which in turn operated the tiny motor at a high rate of speed.

Grossman said his invention could be used in office buildings to provide light, heat and power, while the sun motor could be utilized to operate motor trucks. He will build a larger model to prove his theory.

CATARRHAL DEAFNESS

is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Circulars free. All Druggists.

GET TAXES IN EARLIER.

A number of towns and villages throughout the proivnce are now reporting 1923 taxes coming in satisfactorily. The reason given for this is that the first discount period which was set for March 15th, had induced a number to pay up and thus save the ten or tweve percent. discount. As a result of this several towns report that they have been able to finance their school and the town without borrowing.

While this satisfactory condition exists in other towns, Redcliff has not even its tar notices for this year out yet. Consequently there is no money coming in, the banks will not loan, and the school is closed as a result.

It would appear, therefore, judging from the esperience of other towns, that it would be good business for our town council to see that the tax notices are out early in the year and the discount period set for some time during March or the last day of March. If this had been done this year we have no doubt that there would have been enough ratepayers in town who would have paid their taxes promptly, rather than have the school close down for lack of funds to carry on.

Then during the two months' holidays in the summer there would probably have been enough taxes coming in to open up again for the fall term.

While we are well aware of the fact that the finances commission and the representatives of the bondholders have now some say in the setting of the tax rate, yet there is no reason why they should not have their say in plenty of time to get the tax notices out at the beginning of the year. Representatives of the council are to meet the finances commission some time this month to discuss the town's finances. If this is to continue from year to year, why not have this meeting in the latter part of December, so as not to interfere with getting the taxes in as soon as possible in the year for which they are levied.

It is now the 5th of April and the tax notices are not out yet. They probably will not be out until the end of this month at the earliest. This will mean that little or no taxes will be paid until nearing the end of the first discount period, which, as has already been found out by the closing of the school, is too late to permit the town to function as it should.

While we are free to admit that the earlier collection of the taxes would not solve all the problems with which the School Board is faced at the present time, yet it would place them in a better position to "cut their garment to suit the cloth," for the balance of the term.

Since other towns are benefitting by the system suggested above, it should be worth trying in Redcliff.

Since the publicatoin of divorces among movie stars is now so common as not to attract attention, one movie press agent has hit upon anew plan for his client by advertising the fact that she doesn't want a divorce. It is always the unusual that makes good advertising.

The up-to-date flapper says the reason so many of the dress reformers are glad to see spring coming is because they don't like to see the limbs of the trees so bare.

FAR AWAY PASTURES.

In renewing his subscription to The Review a subscriber in the States writes that conditions among the farming communities of that country are not so prosperous as some in Canada appear to think. He says: "Our farmers are not getting a square deal. With them it's a case of all going out and nothing coming in, therefore I am of the opinion that this prosperity that we of the cities enjoy is not on a solid foundation. Nor can it be until this unbalanced economic condition in remedied. After all, personal prosperity means little if those around us are suffering."

We mention this to show that after all we here in Canada are not isolated in th econditions through which we are passing, as so many appear to think.

With many here at the present time it is a case of "far-away pastures look green," but from information received from various sources and in various ways, all are beginning to realize that present conditions are not confined to any particular country or to any particular part of any one country.

While there may be renewed activities in some particular line in some particular centres, yet as our subscriber intimates, it is not the activity which is built on a solid foundation or conducive to the most lasting results, because it is benefitting the few at the expense of the many.

The man that everybody likes, generally likes everybody.

If all the members at Ottawa would combine they might get somewher ewith the Combines Act.

The whale gets into trouble only when he starts to blow. It's the same with men.

When a man sends out of town for something he can just as well get in town, he is doing his share towards putting his town on the hummer.

The Department of Education announces that they are going to reduce the number of school inspectors by ten. If schools keep on closing down the way they have been lately, there will not be need for any inspectors.

In the bye-election in Moose Jaw, the tariff is again coming in for a prominent place on the hustings. The present government is strong on tariff reduction when in opposition, but weakens considerably when in power, and the electors in Moose Jaw are not losing sight of this fact.

The closing down of the school appears to have been the means of awakening ratepayers to take more interest in town affairs. There is all kinds of talk around these days about what ought to be done and what ought not to have been done, and what is going to be done in future. The closing of the school may in the end be a blessing in disguise.

With the Dominion government and most of the Provincial legislatures, besides city and town councils all discussing and finding fault with our present system of taxation, surely some steps will be taken soon to remedy it. It has often been said that this country, with its federal government, legislatures, county councils, municipal councils, commissions of various kinds and so on, is away over-governed. And it might be added that each of these governing bodies is away overmanned. Each has its system of improving taxes which, in many cases, overlaps, until the average business man, no matter what his line, has come to the conclusion that he is just in business for the good of his country. If taxes are to be reduced the overhead load must be reduced. Then let us start at the top and pare down.

Smile Awhile

Pessimist: "When cats wash their faces it's a sign of bad weather."

Worse Pessimist: "Yes; and when women use washes for their complexion, it's a sign that the beauty of the day is gone."

"Goin' in that house ove rthere?" said the first tramp.

"I tried that house last week. I ain't goin' there any more," replied tramp No. 2.

"'Fraid on account of the dog?"

"Me trousers are."

"Trousers are what?"

"Frayed on account of the dog."

History Lecturer: "Can any of you tell me what makes the Tower of Pisa lean?"

Corpulent Ida: "I don't know, or I would take some myself."

Self-made Man: "I am a self-made man. I began as errand-boy and worked up."

Burglar: "That's nothing. I started in a room over a bank, and worked my way down."

Mr. Flatbush: "These jellies all seem the same flavor to me dear."

Mrs. Flatbush: "But you can tell the difference by the labels."

Mr. Flatbush: "Possibly. I never thought of tasting the labels."

Kind Old Lady: "Whf are you crying like that, my little boy?"

Little oBy: "'Cause it's the only way I know how."

"So you've broken your engagement with Miss Smart?" asked the inquisitive friend. His victim shook his head.

"No," he replied. "I didn't break it off?"

"Ah, then she broke it off?"

"No."

"But it's broken off isn't it?"

"Oh, yes ,she told me what her dressmaker's yearly bill was, and I told her what my income was. Then our engagement gently dissolved."

Here and There

Galt, Ontario. — It is announced by the Canadian Pacific Railway that among the improvements planned for 1923 to company property is the building of a steel water tank to hold from 80,000 to 100,000 gallons at Guelph Jct.

Ottawa. — A constantly growing appreciation on the part of Canadians of their national parks, evidenced by the continued increase in the number of visitors in the last year, is emphasized in the report of National Parks Commissioner J B. Harkin. Visitors to all Canadian national parks during the year in question were estimated at 166,000, of whom more than 71,000 went to Banff. Foreign travelers to the larger parks were about 65,000. From an economic point of view, on a basis of $300 spent by each foreign visitor while in Canada, the national parks accounted for an indirect revenue of some $19,500,000, which amounts to about $2.22 per capita of Canada's present population. Other revenues from the parks, in the way of timber sales and concessions, accounted for $72,000. Total appropriations for the parks last year were $966,000.

Owen Sound. — Superintendent William Bethune, of the C. P. R. lake steamships has announced the officers for the steamers for the coming season. All last year's officers will be in their place without any change. The officers are as follows: S. S. Assiniboine—James McCannel, master; A. A. Cameron, chief engineer; George Bethune, purser; D. A. Sutherland, chief steward. S. S. Keewatin—M. M. McPhee, master; C. Butterworth, chief engineer; C. S. Miers, purser; E R. McCallum, chief steward. S. S. Manitoba—F. J. Davis, master; George D. Adams, chief engineer; George H. Fisk, chief steward; John E. Laine, purser. S. S. Athabaska—Murdock McKay, master; George S. Rae, chief engineer. S. S. Alberta—John McIntyre, master; William S. Struthers, chief engineer.

Winnipeg. — In connection with movement of grain to Vancouver from September 1, 1922, up to and including February 21st, the Canadian Pacific Railway has delivered at Vancouver a total of 6 768 cars of grain representing 9.894,816 bushels.

During the same period there has been exported from Vancouver to the Orient 1,284,550 bushels and to the United Kingdom 10,093,620 bushels, or a total of 11,378,170 bushels.

During the same period last year, the Canadian Pacific Railway delivered at Vancouver a total of 3,461,952 bushels of grain, and there was exported from Vancouver during the same period last year 3.200 000 bushels, 1.220 000 of which were exported to the Orient and 2.080,000 to the United Kingdom.

In addition to this grain, which has already been exported from Vancouver so far this season, there is in store in elevator at that point 942,823 bushels, according to a statement of E. D. Cotterell, Supt. Transportation, Western Lines.

Vancouver. — In the C. P. R. Hotel Vancouver, at Vancouver, there are approximately 600 rooms. The all-the-year-round staff numbers about 400 employees. The comparatively small matter of keeping paintwork, etc., in spotless condition calls for the continuous service of five painters and ten helpers; and five engineers with four stokers, four ash-men, two shovellers and two truckmen are required in the engine-room. Then there are basement cleaners, store-room men, four kitchen cleaners, two printers (for menus), a yardman, an iceman, five food checkers, and three men on food control. The duty of these last is to see that every ounce of food leaving the storerooms is tabulated, so that at the end of each day the results of dining-room operations can be checked instantly. The kitchen is the largest unit of the hotel. There is a chef with 48 assistant cooks, to serve the dining-room and grill. There are three separate cooks for the lunch counter. Two of the cooks attend to the broiling, three do nothing but frying three cook vegetables exclusively and there are six pastry cooks. In addition, there are cooks who boil eggs others who make tea, and others who make coffee. On man spends his working hours making toast and there is another whose sole duty is to clean and open oysters. To feed the guests in one day 90 dozen eggs are required. Between 3 000 to 5 000 lunch and dinner rolls are baked daily and to butter these and for cooking 100 lb of creamery butter are used each day. Carrots are consumed at the rate of 100 lb a day and between 800 and 1 000 lb of potatoes are used every twenty-four hours. Other vegetables are used in quantities of from 50 to 500 lb according to the number of guests in the hotel. It takes from 18 to 20 gallons of cream, 50 gallons of milk and 175 to 200 lb of poultry daily to satisfy the demands of the guests. Winter and summer the hotel ice plant turns out ten tons of ice daily. Even buying at the lowest wholesale prices, food alone costs the hotel from $1,500 to $2,000 daily.

NOW GETTING GASOLINE FROM ALBERTA WELLS.

Quantities of gasoline amounting to between 40 and 85 barrels daily, and natural gas amounting to between 1,500,000 and 3,000,000 cubic feet daily can be obtained from the Alberta-Illinois well, west of Okotoks, according to the report of S. E. Slipper, Dominion Government petroleum engineer. Mr. Slipper in his report, states "the test shows that the well is an important producer of gasoline gas, from which gasoline may be extracted on a commercial scale."

Figures just published at Melborne show that the population of Australia in December, 1922, was 5,634,000.

"Yes," replied the youth. "I'm the only heir he has."

Helpful Hints for Farmers

Supplied by Experimental Farms in different parts of Dominion

Caterpillar Is Injury to Shade Trees in South

Thesouthern part of the prairie provinces suffered last summer from a rather severe outbreak of tent caterpillars, poplar bluffs and shade trees being badly defoliated in many places; it is probable that the same areas will be quite as severely affected during the coming summer.

The insects causing the injury are the caterpillars of small brownish moths. The moths laid their eggs last summer in ring-like masses about the twigs of poplars and other broad-leaf trees, and in some cases scores of these egg-masses may be found on a single tree. Early next season, shortly afte rthe poplar buds open, the caterpillars will hatch from the eggs and feed upon the young foliage. When the attack is severe the defoliation may be complete, and although the trees may develop foliage again later in the season ,they will be disfigured for a great part of the summer and very considerably weakened by the injury.

The defoliation to shade trees and shelter belts may be prevented by spraying the infested foliage as soon as the young caterpillars appear. Wherever the injury is to be expected this year ,preparations for spraying should be made in plenty of time, so that the treatment may be applied when it will do the most good.

A suitable pump and a supply of arsenate of lead should be available before the middle of May. A "bucket-pump" will serve for spraying a few small trees, and a "barrel-pump" with an extension rod can be used effectively on a considerable plantation; cities and towns should employ power sprayers.

Arsenate of lead is the best insecticide for the purpose. It may be obtained in the form of a paste or powder and should be used at the rate of two and one-half pounds of the paste or one pound of the powder, thoroughly mixed, to forty gallons of water. The powder is to be preferred.

If poplars were defoliated in the neighborhood of 1922, those who have trees to protect should order suitable spraying materials early and arrange to spray their trees at the proper time

Enquiries should be addressed to the Dominion Entomologist, Department of Agriculture, Ottawa. No postage is necessary on such letters. A circular on Tent Caterpillars and their control may be had, free of charge, on application.

PLUMS FOR THE PRAIRIES.

The lack of trees in a prairie landscape directs the newcomer's thoughts toward orchard possibilities. It is quite feasible to have at least a home fruit garden growing fruit trees.

At the commencement it is best to use "sure-thing" material. The hardest useful tree is the plum. There are plums which are hardier than any known commercial variety of crab apple. Plums grow in thickets along the English river in Northern Ontario ,and native plums are found in quantity in the Riding Mountains. Some types of these wild plums are pleasing fruit to eat from the hand, and most varieties make tasty jellies, preserves and pies.

When a fruit is found thriving in the filds it can fairly be expected that its range may be successfully extended northward, so long as it is grown in a well tilled and sheltered garden. Under such conditions its struggle for existence is eased and heavier crops will be borne.

At the Morden Experimental Station and at some nurseries in the province, a number, even of southern plums of good quality, are grown. Among these are the Omaha, Emerald, Stella, Kaga and Waneta. At one nursery a number of varieties thrive. A number of commercial sorts are listed, such as Mammoth, Cheney, Assiniboine, Aitkin, Compass, Sapa, Opata and Sansota. There are other varieties which are hardy, but have proved of no great value, such as Brandon and Major. A large number of improved native plum seedlings are bearing at the Rosthern Experimental Station.

The planting of plums may well be widely encouraged. Choose the hardy varieties in the same garden, as most plums require cross-pollination before a good set of fruit will be secured. Natural prairie loam, unfertilized, is favorable, if well tilled and well drained. To delay the season of blooming until danger of frost is past in the spring, it is best to choose a northerly slope, or to have a shelter of trees on the south side.

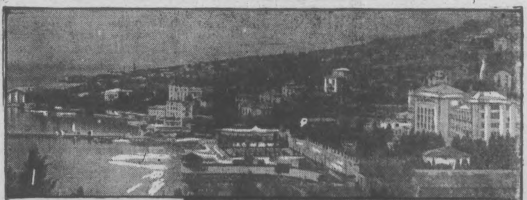
A shelter belt extending all along four sides is desirable. If one side must be open let it be the east. Plum trees tend to bear heavily and to be broken down when the loaded branches are tossed by the wind. The sand-cherry hybrids, Sapa, Opata, etc., are best grown as bushes. But protection from direct winds is to be desired for all types of plums. Such varieties as Champa and Waneta are apt to split, even when the shelter is fairly good.

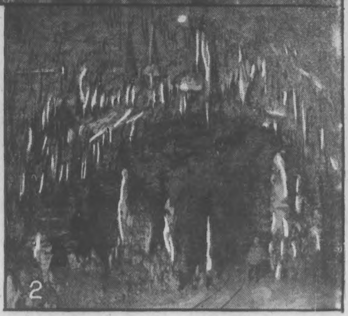
A general planting of pits of hardy plums will hasten the improvement of prairie horticulture.

Poultry Notes

How many eggs to give a broody hen is to quite a lot of people a most perplexing proposition, and one hears all sorts of numbers suggested as being the best or most suitable. Again, superstition enters largely into this and despite the fact that he number thirteen is recgoned with many people t obe an unlucky number, yet curious to state, that thirteen eggs is the common amount placed under the broody hen. So much is this believed that there are many who positively refuse or, rather, take care, that they sit biddy down on the "baker's dozen" of eggs. Thi sis altogether a great mistake and the luck of the resultant hatch has nothing whatever to do with the number of eggs set. There are other things, however, that matter a great deal, and if the most successful results are hoped for, they ought to be as nearly as possible adhered to. A very general idea also prevails to give biddy as many eggs as is possible. In many cases it runs around fifteen or sixteen eggs, and thi sis done, no matter what weather conditions are prevailing at the time, or whether early or late in the season. Success cannot be found following these lines. Really the first thing to do is to figure up the size of the broody hen that is to be set down. whether she is small, medium or large. It ought to be generally known that a small hen will not cover as many eggs as will a large hen. Then you have the time of the year to consider, and the colder the weather is the more difficult it is for the hen to gather sufficient heat, and where too many eggs are given there is always one or two either partly or totally exposed, and unfortunately, it is not always the same eggs that are exposed or uncovered. The hen when turning her eggs is likely to expose a different egg each time, with the result that quite a few of them get chilled and you are really worse off than if you had only set down as many as she could cover easily. Nine to ten eggs is plenty for a nice size broody in cold weather. A few more may be given in warm weather, but don't be too greedy in giving too many at any time, for if they don't get chilled, usually one or two of them get broken and all the other eggs get messed up, following which they never hatch so well. Many of you have experienced this no doubt. It will pay you to give her just as many eggs as she can sit on easily, and get off and on her nest without breaking them. By way of a suggestion a broody hen should always be set at night, and it is surprising how much easier and quicker she will take during cold weather if you warm the eggs just ever so little before placing them under her. Apparently she likes the warm feel of the eggs. Give the broody a sporting chance; she will do all that is required.

Italy's New Riviera





(1) Portorose, Italy.
(2) Grotta di Posturnia. The Great Cave.

Few regions can boast of so great a variety and so large a number of climatic and health resorts as the bounty of Nature and the activity of man have created in the Venezia Giulia. Before the war some of these resorts were flourishing and popular. There assembled in crowds the flower of the aristocracy of the nations: the rich and elegant, not only of Europe, but from more distant countries beyond the ocean. They went there as to a charming refuge from freezing climates, or as to an oasis where they could rest in physical repose and intellectual enjoyment from the worry and stress of the daily fight for life.

The fury of the war-storm and the innumerable dissensions of the long conflagration have naturally had a discouraging effect on the movements of visitors, and for several years there has been only a dreary desert where formerly life had triumphed in its most fascinating expressions of joy, beauty and richness.

A journey in this beautiful country, now in full process of rebirth and development, offers the greatest artistic attractions and rich and varied material for observation.

Take Abbazia for example. Abbazia, on the eastern coast of Istria, in the embrace of the Quarnaro, slopes graciously at the foot of Monte Maggiore (1400 m.), which protects it from cold winds. The vegetation there is superb, almost tropical, deep and vast laurel woods, innumerable gardens, flowers in profusion. The climate is excellent, the beach delightful, the sea of a fascinating blue; which with its charming walks have given world-wide fame to Abbazia.

Before the war every year 50,000 visitors passed through Abbazia during all seasons, since that fortunate district enjoys an eternal spring. Many illnesses are cured there. The best results, however, are obtained as a winter climatic station in the treatment of all diseases of the heart or of the nervous and circulatory systems, the lungs, or of any constitutional weakness. It is highly beneficial to weak or sickly babies.

An entirely different type of bathing and climatic resort is the island of Brioni, near Pola.

Brioni, until a few decades ago was desolate, and now, thanks to Signor Koppelwieser, proprietor of the great hotels established there, it is a veritable Paradise.

The aristocracy of Austria, Germany and Hungary used to make Brioni their chosen retreat.

Brioni seems, so far as vegetation is concerned, to be a strip from the Migurian Riviera; there are delicious woods, alluring walks, palms and genista in profusion everywhere. The larger island was the summer abode of the Roman patricians, and there are still interesting Roman remains ruined temples, mosaics, etc.

Moreover, there is at Brioni a large Hagenbeck Zoo, an establishment for rearing ostriches; tennis courts, etc. But the speciality is a huge swimming-bath made of tiles of majolica, large enough for two hundred persons, for hot sea-water bathing in winter.

Also at Brioni the climate is excellent.

Another charming climatic and balnearic resort in Istria is Porto rose, near Pirano, about one hour from Trieste. Portorose is in the neighborhood of the finest saline springs in Europe, and has one speciality truly unique, the so-called "aqua madre," which is the liquid residue of the marine crystallized salt during the summer months.

This saline "aqua madre," brought to the baths of the establishment and heated to a temperature of 50C is used for various medical applications for its abundant contents of alkaline and iron salts

A balnearic station of the future is Grado, in the vast Gulf of Trieste, with its splendid beach and its many bathing tents.

There are many other climatic and bathing stations in the Venezia Giulia. We must not forget Laurana, quite near to Abbazia and with surroundings perhaps even more beautiful as regards vegetation and position, than those of Abbazia.

Noteworthy also are Lussinpiccolo and Lussingrande, Cigale and Sansego, with magnificent beaches and delightful climates, being perfectly adapted for the cure of catarrhal affections.

Sumptuous and elegant hotels are provided also at Parenzo and Rovigno, towns that remind one exquisitely of Venice, picturesque and interesting for the monuments of art that they possess.

The fame of the castle of Miramar, in the gulf of Trieste, is too great to need mention. Miramar is still the adored of poets and artists, and we believe that few other places in the world can impart the same sensations of wonder and delight.

Weekly News Bulletin

Issued by Publicity Commissioner, Government Buildings, Edmonton

More Alberta Coal For Ontario.

Several carloads of Alberta coal, shipped from different points in the province, are now on their way to Ontario where they will be used in tests in Ontario homes, under the auspices of the Alberta government and in cooperation with the Ontario government. As stated last week, Howard Stutchbury, trade commissioner of Alberta, and Geo. R. Pratt, the government's fuel engineer, will conduct the tests. It is proposed by the government to carry on a vigorous campaign for some time with a view to popularizing Alberta coal in Ontario, and furthering the movement to obtain a freight rate that will put Albert coal into Ontario in competition with the American coal. Mr. Stutchbury is also to appear before the Senate fuel committee to give evidence relating to this problem.

* * *

May Build Long-Awaited Branch.

According to an announcement from Winnipeg the C.P.R. contemplates the coming season the construction of 22 miles of the Kipp to Retlaw line in southern Alberta commencing from Kipp. If this is built it will traverse much of the district to be served by the Lethbridge Northern irrigation project and will render these lands much more attractive to prospective irrigation settlers.

* * *

Marketing Seed Grain.

A large proportion of the 16,000 bushels of registered seed grain being handled through the Alberta government cleaning and grading plant at Edmonton for seed growers in the province, has been marketed satisfactorily. Carloads of seed wheat have been forwarded from the plant to points in eastern Canada and the States. The plant has been operating day and night recently to keep up with orders for the seed. The cleaning and grading plant is one of the most modern on the continent ,and as many as fifteen grades of wheat can be obtained through the various processes of cleaning and grading. The large Monitor fanning mill has a capacity of 500 bushels an hour, and is capable of producing four grades of grain. The Rotary grader produces as many as six grades, and the Vickers cylinder machine gives another three or five if necessary. The cost of the plant was between $5,000 and $6,000.

* * *

New Plan for Irrigation Course.

Though the closing of two of the agricultural schools has been forecasted, the teaching of irrigation in the south is not likely to be seriously affected, if a proposal made to the Dominion for a winter course at the Dominion experimental farm at Lethbridge is adopted. The proposal has been made by Hon. Geo. Hoadley that the provincial and dominion governments co-operate in such a course, to be held during the month of January in each year.

The teaching of irrigation has been in progress in three of the schools, namely: Olds, Claresholm and Raymond. This is of necessity a winter course, so that a joint winter course at Lethbridge as proposed, would go far to replace any loss by the closing of one of the southern schools.

* * *

In the Legislature.

Debate on the budget, and estimates, which were introduced by Premier Greenfield, has been in progress in the legislature during the past week, and is being resumed again on Tuesday, when the members gather after the Easter recess.

On Monday the house divided, 30 to 12, against a resolution introduced by J. Dechene of the opposition, as follows:

Resolved that in the opinion of this House the Government of the Province should request the Government of the Dominion to oppose any legislation which may be introduced in the Parliament of Canada permitting Oleomargarine to be sold in this Dominion, as such legislation would be detrimental to the producers of dairy products in the Province of Alberta.

The house also divided on Monday on a motion by F. J. White, of Calgary, to have the amendments to the Edmonton Charter recommitted to the committee of the whole house. The motion was lost by a vote of 13 to 29.

Night seesions have been in progress during the week, and will continue until the conclusion of the house. There is still considerable legislation to be considereh, and the question of a plebiscite on the liquor petition is also to be dealt with.

Bills introduced during the week include one by Hon. Mr. Reid to amend the village act, and one to amend the municipal districts act, and one by Mr. Johnson of Medicine Hat to amend the public libraries act, which seeks to make it necessary for certain municipalities to set aside a set amount each year for public library purposes.

* * *

The 1923 Budget.

A reduction in estimated expenditure to 1923 over the actual expenditure of 1922 ,of more than $6[illegible]4,000, and the proposal for several new tax forms to increase revenue, are features of the 1923 budget which was submitted by Premier Greenfield, who is also provincial treasurer.

The reductions planned will result in the elimination of several government services, as follows:

Reduction in grants to primary, secondary schools and University of Alberta.

Reduction in staff of school inspectors.

Discontinuation of normal school at Edmonton.

Closing of two more schools of agriculture.

Reduction in staff of public health nurses.

Big reduction in capital expenditure on roads, bridges and public buildings.

Centralization and rearrangement of care of mental patients to bring about saving in capital expenditure.

New Taxes.

The new taxes proposed are as follows, and are expected to yield a considerable amount in new revenue.

Provincial tax on mineral leases.

Tax on soft drinks.

Tax on slot gambling machines.

Succession duties act advance.

Reductions in estimated expenditure in each department for 1923 over the actual expenditure of these departments for 1922, have been made as follows:

Civil government	$ 81,573.56
Legislation	6 264.45
Administration of justice	66,912.24
Public works	129,291.13
Education	119,309.70
Agriculture and statistics	263,006.61
Railways branch	5,482.31
Municipal affairs	2,939.17
Total	$674,779.21

WILL USE ALBERTA SEED FOR ADVERTISING

Albert prize-winning seed grain will be used by the Dominion government to advertise Western Canada abroad during next year. This is as a result of a deal completed during the past week between the field crops branch of the Alberta Provincial Department of Agriculture and representatives of the Dominion Department of Immigration and Colonization. Purchases include N. Taitenger's prize Marquis wheat from Claresholm, and J. W. Bigland's champion oats from Lacombe.

Blackfoot Indians on reserve at Gleichen, just ,east of Calgary, have been given a taste of their ancient food ,buffalo meat, the Dominion government having sanctioned the sending to them of 3,000 pounds from the Wainwright buffalo park, which is overstocked.

Linked With Canada's Development

Established forty-five years ago, this bank has been a constructive element in Canada's development. We now have 218 branches, each equipped with adequate facilities to render complete banking service to manufacturers, merchants, financiers, agricultural producers and individuals. Affiliation with strong banking institutions abroad, provides for every phase of international trade. 308

prevents that sinking feeling

Stop The Little Leaks

A few weeks ago the organized farmers of the three Prairie Provinces held, in succession, their great annual conventions. At each of these gatherings the subject uppermost in the minds of all was "Wheat Marketing"—the development of some system whereby the growers of Western wheat could be assured of a larger return for their product.

At the present time the Legislatures of these same three Provinces are in session, and one of the outstanding questions calling for discussion and legislative action is likewise the same, the marketing of wheat. The Dominion Parliament is also in session, and there, too, the all-absorbing topic of wheat marketing is up for discussion and probable action.

Nobody in the West will for one moment question the vital importance of this subject, not alone to the farmers of the West, but to the Canadian people at large, for it is now generally recognized that much of the prosperity of Canada depends upon the prosperity of the Western farmer. Every Fall the eyes of the whole Dominion turn westward, and in the banker's board room, the manufacturer's office, the railway executive's office, in store, shop and factory, the question is asked: "What of the Western wheat crop?"

All is not well with Canadian agriculture. This is a fact impressed upon the attention of the Dominion. Economic conditions are not good, either at home or abroad, although, fortunately, they are gradually improving. But the fact cannot be ignored that the grower of wheat in Western Canada is not prosperous; is not in receipt of a reasonable profit on his investment and labor; in all too many instances is in receipt of no profit at all, but is, and has been, actually operating at a loss.

It is, therefore, of the utmost importance, primarily to the farmer, but also directly to every man, woman and child in the Dominion, that an improvement in agricultural conditions and economics be brought about without further delay. That the costs of marketing are too high, that present methods of marketing are unscientific, that too great a toll is levied on the grain in getting it to the consuming markets of the world, are facts generally admitted; hence the almost universal demand for the introduction of some new system of control and direction in grain marketing.

That something in this direction needs to be evolved goes without saying, but at the same time is there not danger in too great a focusing of attention on the attempt to find one remedy for a great leak, and an ignoring of other and smaller leaks but which, in the aggregate, may mean quite as serious a loss?

For instance, official records have established the fact that during the last shipping season thousands upon thousands of tons of weed seeds were hauled by the railways from the prairies to the lake port terminals. Last season's wheat graded uniformly high, but it was also remarkable for the quantity of weed seeds contained in shipments. It not only cost money to clean all this grain, but the farmers of the West paid thousands of dollars in freight charges on this enormous quantity of weed seeds. Surely this is a leak in profits which could, and should, be stopped.

It costs just as much to plow and harrow and drill an acre of land sown with inferior seed as it does to perform the same operations preliminary to sowing the best seed obtainable. There is a difference in the price of the seed itself, and that is all. Later on it costs just the same to cut the standing crop on that acre irrespective of the fact whether it is all grain or partly grain and partly weeds.

The cost of preparing an acre of land, and sowing it to crop, that yields twenty-five or thirty bushels of wheat is but little more than the cost of slipshod farming methods and poor seed which results in only ten or fifteen bushels. A binder will just as easily and economically cut a standing field of grain with large and well filled heads as it will one of small heads and shrivelled kernels. But what a difference there is in the financial returns to the farmer from the larger yield per acre!

Despite high costs of production last season, excessive marketing costs, and unsatisfactory marketing methods, some farmers made money last year, while others lost money. The ones who made money were those who had the heavy yields per acre. Weather conditions are, of course, always a factor because no matter how painstaking a farmer may be, or how good and clean the seed sown, there must be a sufficiency of moisture to ensure a crop. But things being equal the good farmer, sowing clean seed, will obtain results in larger yields and, consequently, larger financial returns.

While, therefore, working for better marketing conditions, the individual Western farmer will be wise in his day and generation who farms well, sows only good, clean seed, and wages unremitting warfare on weeds. No matter how favorable the growing and ripening season may be, the maximum results cannot be obtained unless a right beginning is made, and the foundation of a good crop is good seed, just as truly as the foundation of a good herd is to be found in making a start with pure-bred stock.

Do not overlook the little leaks—which are not so little after all—while giving so much, and necessary, attention to the big features of the problem.

1922 Dominion Income Tax $55,517,222

Montreal paid the largest amount of income tax during the fiscal year to December 31, the amount being $18,195,749. Toronto came next with $11,743,770 and Winnipeg third with $4,019,399. The total collected income tax throughout the Dominion in the same period was $55,517,222.

A ton of water from the Atlantic, evaporated, yields 81 pounds of salt; a ton of Pacific water, 79 pounds; a ton of Dead Sea water, 187 pounds.

Anyway, the average woman knows about as much about things political as the average man knows about caring for a baby.

Killed By Blood Poison

Used old razor for paring his corns. Foolish because 25c buys a bottle of Putnam's Painless Corn Extractor which for fifty years has been removing corns and warts without pain. No failure if you use "Putnam's". Refuse a substitute, 25c everywhere.

Canada as a Gold Producer

Canada was the only country to show a marked improvement in gold production in 1922. The Dominion now ranks second highest producer in the Empire and third in the world. In 1922 Canada produced gold to the value of $26,500,000, compared with $19,400,000 in 1921, and $16,500,000 in 1920.

"My Hands Trembled and I Could Not Sleep"

Mr. Thomas Honey, Brantford, Ont., writes:—

"When I began taking Dr. Chase's Nerve Food, I was so nervous that when I picked up a cup of tea my hand would tremble like a leaf. I could not sleep well, could not remember things, and there were neuralgic pains through my body. After taking seven boxes of Dr. Chase's Nerve Food, however, I am in perfect health."

DR. CHASE'S NERVE FOOD

60 cents a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto.

Bought Canadian Paper

U.S. the Largest Customer for Surplus Nesprint

Newsprint paper exported from Canada during January, 1923, amounted to 1,655,783 cwt., and was valued at $6,138,827, slightly less than was exported in December. In January of last year the quantity exported was 1,254,024 cwt. The United States was the largest customer by far for newsprint last January, taking 1,633,823 cwt.; New Zealand took 9,381 cwt.; and Australia 8,988 cwt. Smaller quantities went to British West Indies and South America. Australia was Canada's largest customer for bond and writing paper, taking 288 cwt. out of a total of 739 cwt. The United Kingdom and Australia imported most of the 18,273 cwt. wrapping paper exported in January. The United Kingdom took 9,706 cwt., and Australia 4,829 cwt. Newfoundland and Japan were the next best customers for wrapping paper.

INFLUENZA LEAVES THE BLOOD THIN

To Restore Full Health Tonic Treatment is Recommended

Probably the most treacherous trouble that afflicts the people of Canada during the winter months is influenza—or la grippe as it is often called. The disease is treacherous, because often after the characteristic symptoms of the trouble have disappeared it leaves behind it a weakened and debilitated constitution which makes the victim an easy prey to other troubles. All this is due to the fact that the attack of influenza has left the blood abnormally weak and thin. Weak blood means impaired digestion, a feeling of tiredness after slight exertion, and often a nervous breakdown. This condition will continue until the blood is restored to a rich, red, disease resisting condition. For the purpose of enriching and stimulating the blood no other medicine equals Dr. Williams' Pink Pills. These pills act directly upon the blood, and through the blood upon the nerves and in this way act as a restorative to the whole system. Thousands throughout Canada have proved the value of Dr. Williams' Pink Pills in cases of this kind, among them is Miss Ida M. Fraser, R.R. No. 2, Thessalon, Ont., who says: "I passed through a severe attack of influenza which left me pale, thin and weak. Indeed I was so weak I could scarcely stand upon my feet. The medicine I was taking in the hope of bringing back my health did not help me, and I was greatly discouraged. Finally I decided to try Dr. Williams' Pink Pills and from the time I had taken the first box my health began to improve. I used six boxes altogether, and found as a result that I was again strong and healthy, and I think that in cases of this kind they are worth their weight in gold."

If you have passed through an attack of influenza, your speediest way to regain full strength is through the fair use of Dr. Williams' Pink Pills. You can get these pills through any medicine dealers, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Quadruple Pay for Sunday

According to the laws of Australia a man who is required to work on Sunday must be paid four times his daily wage.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Egypt's "Ship of the Sun"

Discovered on Bank of Nile Partially Covered by Sand

On the banks of the Nile, about two days' journey from the Pyramids, has been discovered a huge "ship of the sun." The vessel which is yet only partially uncovered from the drifted sand, is of brick and dates back probably 3900 B.C. It is an image of the ideal ship in which the Egyptians believed that the sun crossed the "celestial rover" each night to re-appear on the eastern shore at daybreak. There are indications that the ship was once elaborately fitted up and that the fittings have been at some time destroyed by fire, the brick hull alone remaining intact.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Working a Word Hard

Frenchman Visiting Shipbuilding Plant in States Was Puzzled

We do not always realize how frequently we use the same sound to express entirely different meanings. The puzzled Frenchman who was making a visit to a Yankee shipbuilding plant realized it, however. He saw a man working at a piece of timber and asked him what he was making.

"A yard," was the laconic reply.

"Is it nearly finished?" the Frenchman asked.

"All but a yard," said the workman.

"Where do you get your timber?"

"From the yard."

Thereupon the Frenchman gave up in despair.—Youth's Companion.

Minard's Liniment for sale everywhere

ECZEMA IN RASH ON HANDS

Fingers Cracked. Lost Sleep. Cuticura Heals.

"Eczema began with a rash on my hands and I could not put my hands in water. It grew worse every day and my hands and fingers all cracked which made them covered with eruptions. I lost sleep with the itching.

"The trouble lasted three months before I heard of Cuticura Soap and Ointment, and after using three cakes of Cuticura Soap and two and a half boxes of Cuticura Ointment the eczema was healed." (Signed) Miss Eva E. Belliveau, 338 Highfield St., Moncton, New Brunswick.

For every purpose of the toilet and bath Cuticura Soap, Ointment and Talcum are wonderfully good.

Sample Each Free by Mail. Address: "Lymans, Limited, 344 St. Paul St., W., Montreal." Sold everywhere. Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Soap shaves without mug.

Minute Engraving on Glass

Readable Only When It Is Magnified 1,000 Times

The Bureau of Standards was recently asked to measure what is probably the smallest piece of engraving in the world. The engraving consists of the Lord's Prayer (57-word version) engraved on glass in a space of .001 by .002 of an inch. The writing can only be seen under a high-power microscope, the magnification required being from 900 to 1,000 times. The measurements by which the above dimensions were determined were carried out in the laboratories of the bureau.

The extremely small size of this engraving will be realized when it is considered that if a square inch were entirely filled with writing of this size the entire Bible could be written 25 times in that space—in other words, something more than 20,000,000 words could be written in a square inch.

"Cascarets" 10c

Best Bowel Laxative When Bilious, Constipated

To clean out your bowels without cramping or overacting, take Cascarets. Sick headache, biliousness, gases indigestion, sour, upset stomach and all such distress gone by morning. Nicest physic on earth for grown-ups and children. 10c a box. Taste like candy.

Transplanting Heads of Insects

A biologist of the Vienna University has succeeded in transplanting heads from one insect to another and making them grow on the new body without fatal effects. Our black water bugs thrive and eat with as much gusto after exchanging heads as before.

The antelope, swiftest of animals, can do 62 miles an hour at top speed.

MOTHER! MOVE CHILD'S BOWELS

"California Fig Syrup" is Child's Best Laxative

Hurry mother! Even a cross, sick child loves the "fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Household Hints

Valuable Recipes For the Busy Housewife

Oatmeal and Raisin Cookies

1¾ cups rolled oats, 1 egg.
½ cup butter or shortening.
1 cup sugar, ¾ teaspoon cinnamon.
½ teaspoon cloves, ½ teaspoon all spice.
2 teaspoons baking powder.
¾ cup chopped Sun-Maid raisins.
½ cup milk.

Put rolled oats through food chopper. Cream butter. Add sugar, well beaten egg, raisins and rolled oats. Mix thoroughly. Sift flour, baking powder, salt and spices together and add to egg mixture alternately with the milk. Drop from teaspoon on greased pan and bake in moderate oven 15 or 20 minutes. ½ cup chopped nuts may be added with the raisins if desired. This makes about 30 cookies.

Brambles

1 cup sugar, juice of 1 lemon.
1 cup chopped Sun-Maid raisins.

Make enough ice crust for one pie and cut as for cookies. Mix the sugar, chopped raisins and lemon juice together. Add a little flour if too juicy. Place a teaspoon of the mixture on each round of crust and fold over like turnovers. Pinch edges down to prevent juice from stewing out. Place in shallow tins and bake until brown.

THOUSANDS CONVERTED

Through ignorance, many have suffered aches and pains long thought incurable. But doubt quickly turns to belief when Sciatica, Lumbago and Neuralgia are healed with Nerviline. Its soothing healing powers are really wonderful. Nerviline sinks in quickly, it penetrates into the sore muscles and brings grateful relief. The hundred and one minor ills that come to every family yield quickly to Nerviline. Try it. 35c at all dealers.

University Report

During the present term there are 1,283 students registered at the University of Alberta, according to the annual report of that institution. Of these 336 are first year students, 265 second year students, 208 in the third year and 104 in the fourth year, with 68 graduates. The remainder includes 123 corresponding students, 74 summer session students, 59 special students, 10 public health nurses and 9 B. D. students. There are 666 students in arts and sciences, 81 in applied science, 222 in medicine, 143 in law, 102 in agriculture and 44 in pharmacy.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

Vaccine for Pneumonia

Disease Can Be Decreased When Discovery is Perfected

When vaccine, now being perfected, is made available to the public, the death rate for the United States alone, it is averred, can be lowered by 150,000 annually.

This announcement, said to be the most important in the field of medicine in twenty years, was made recently by Dr. Russell L. Cecil, in charge of research work on pneumonia and other respiratory diseases, for the United States Public Health Service.

The work done in the laboratories covers a year's time and includes tests made on monkeys. The only problems remaining to be solved concern further refinement of the vaccine and methods for manufacturing it cheaply enough to be distributed in large quantities. When these details have been worked out pneumonia epidemics will no longer menace. Deaths from respiratory diseases, which have been steadily on the increase with the gathering of even larger numbers in urban centres, can be decreased, if not altogether eliminated.

Paper Tires

Automobile tires made of paper are being tried in Europe. It is reported that the new tires have the elasticity of rubber, while they are as strong as if made of metal.

A Power of its Own.—Dr. Thomas' Eclectric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

The Arctic Ocean is said by scientists to be getting appreciably warmer.

Tribal custom decrees that anyone who copies the figures on a totom pole shall be severely punished.

Minard's Liniment used by Physicians

GLAD SHE DID AS DOCTOR TOLD HER

Took Tanlac On Physicians Advice And It Put Her In Fine Condition, States Mrs. Coles

"Tanlac is certainly an ideal medicine," recently said Mrs. Bessie Coles, highly esteemed resident of 1851 Lorne St., Regina, Sask.

"I was in such a badly run-down condition that I just felt miserable all the time. My appetite had failed me to such an extent that I was losing weight steadily. My nerves were awfully unstrung; many, many times I couldn't get even an hour's sleep all night long, and I never felt like doing my housework at all.

"I was badly in need of something to build me up and when a physician advised me to take Tanlac, I lost no time getting a bottle. Now, I really don't feel like the same person, the medicine has done me such a world of good. My nerves have steadied down. I am sleeping like a child, eating heartily, have gained several pounds, and am feeling just fine. Knowing what a wonderful medicine Tanlac is, I can sincerely recommend it to anyone."

Tanlac is for sale by all good druggists. Over 35-million bottles sold.

Canadian Exports

Canada Now Stands Fourth in Volume Of Exports

The remarkable growth of Canada as an exporting country is graphically illustrated by a chart which has just been issued by the Department of Trade and Commerce. Before the war Canada stood eighth in volume of exports; she is now fourth. Before the war she ranked eighth in exports per head. She is now a close second to Australia, and for a considerable time during and after the war, was first.

PILES Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample Box free if you mention this paper and enclose 2c. stamp to pay postage.

KENDALL'S SPAVIN TREATMENT

Great Benefits Will Follow Plan Evolved For Interesting British Youths In Canada

A direct stimulus to British-Canadian immigration, particularly in turning the minds of England's youth, agriculturally inclined, towards farming opportunity in Canada, is contained in the announcement that Mr. E. W. Beatty, President of the Canadian Pacific Railway, is awarding a full summer course at the agricultural schools of Alberta to the four prize winners of the Young Farmers' Clubs of Great Britain. Few schemes, so far devised with an encouragement of desirable immigration in view, are calculated to have the permanent and lasting effect of this one, with the best and most accurate knowledge of farming conditions in the Canadian West implanted by Canada's foremost agricultural experts in youthful minds cultivated to assimilate it, and capable of disseminating their impressions among the youth of Great Britain.

The London Daily Mail was responsible for the movement known as "The Young Farmers' Clubs of Great Britain." Small organizations were formed in farming communities of the British Isles and some particular or specialized line of farming taken up by its members, the result being Calf Clubs, Pig Clubs, Poultry Clubs, Bee Clubs, Rabbit Clubs, etc. For a long while there has been a similar successful organization in the United States which each year offers a prize for a trip to Europe to six members of the prize-winning club in the country. A like movement initiated in Canada, whilst it has not moved along with the same enthusiasm, has nevertheless shown considerable progress in certain localities. These organizations in Saskatchewan increased their membership from 460 in 1913 to 30,000 in 1921, whilst in the same time, in the province of Manitoba, the movement has developed from an initial 7 clubs to 240 clubs with 1,500 branch clubs and a total membership of 25,000.

There has been considerable association and interchange of visits between these boy organizations of the United States and Great Britain which has brought the operations of each to a high pitch of enthusiasm and done much to effect a mutual understanding in agricultural matters between the two countries. The London Daily Mail conceived the idea of promoting the same spirit of emulation and competition and giving the youthful students of agriculture in Great Britain a more comprehensive understanding of overseas farming conditions by effecting an exchange between the agricultural students of the Motherland and the Dominion. They approached the President of the Canadian Pacific Railway, with the result that he authorized the visit of the delegation of four young English farmers to Canada to take the summer agricultural courses in Alberta, all their expenses being defrayed.

The four selected boys will arrive in Canada early enough to commence their summer course at the Alberta agricultural schools in May. They will be given as thorough and comprehensive an impression of Western Canadian agricultural conditions as possible in the time, visiting different areas and such agricultural fairs and exhibitions as offer. They will return to England in the fall, where arrangements have been made for them to write up their experiences in the agricultural press of the British Isles.

The benefits which may follow in the wake of this scheme are manifold. No phase of Canadian immigration has, in the past, produced such excellent results as that of young boys from England who have grown up with the land and rapidly absorbed its ideas and ideals. Could the settlement be induced of those with expert agricultural knowledge and experience in their formulative years, a tide of very valuable colonists might set in. For the main part agricultural students in the British Isles are farmers' sons, and this dissemination of authentic information on Western Canadian conditions in a class Canada has always considered most eminently desirable as settlers, cannot but be productive of satisfactory results.

Other developments should result from the stimulation of mutual interest in agriculture in the two countries. There is some possibility of the award being made an annual one, and it is confidently hoped that some arrangements may be made to have representatives of the Canadian Young Farmers' Clubs visiting England every year. The visit of young British agriculturists should stimulate a desirable immigration movement, whereas a complimentary movement of Canadian youthful farmers overseas, in addition to furthering agricultural knowledge, should develop a clearer understanding of the British and European markets, to which in the future Canada must look to an ever-increasing extent for the disposal of the products of her farms.

Many Uses For Sawdust

It Is Found To Be a Most Useful Material For Many Purposes

The doll trade could hardly do without sawdust. Thousands of dolls are stuffed with it each year.

It is the best thing there is for packing oranges for export, and chilled sawdust is sometimes used in preference to ice for packing fish.

Sawdust makes a splendid manure, especially for young trees. Dug into the garden it will enrich the soil amazingly in much the same way that pine needles make excellent mould.

Sawdust is much used in the building trade. Rammed in between hollow walls, it makes a first-class sound deadener. It is also used in the walls of cold storage rooms to prevent the passage of heat from outside to the store room.

As a cleansing agent, sawdust stands very high. It is used for spreading on floors of butchers' shops, while damped sawdust, if swept up with dust, will prevent the dust blowing about.

The sawdust of mahogany wood is used for smoking fish by burning it slowly when damp.

Woodstone is sawdust mixed with magnesia cement compressed under enormous pressure. This woodstone is very like ordinary wood, save that it has no grain. It is made in planks which can be cut with a saw and planed, and has the advantage of not being inflammable. Bricks are made of sawdust by mixing it with mineral substances and subjecting it to great pressure.

The army uses sawdust extensively for the cavalry riding schools. Mixed with tan it makes an ideal floor for the horses' hoofs. While sawdust mixed with tar and pressed into briquettes makes an excellent substitute for coal to feed the open fireplaces in the home.

A Record In Construction

What is believed to be a record in the construction of a paper mill has been achieved by Westminster Paper Mills, Ltd., New Westminster, B.C. Erection of this plant was started on July 8, 1922, and at 4 p.m., on December, 1922, the first paper was produced. The company's product will be made from pulp made in British Columbia, produced by the Whalen Pulp and Paper Mills.

And many a man's race prejudice is due to his having bet on the wrong horse.

Constipation Banished

A druggist says: "For nearly thirty years I have recommended the Extract of Roots, known as Mother Seigel's Curative Syrup, for arresting and permanently relieving constipation and indigestion. It is an old reliable remedy that never fails to do the work." 30 drops thrice daily. Get the Genuine. 50c. and $1.00 bottles.

Americans Interested In Western Canada

Immigration from U.S. Points Promises to be Heavy this Year

(By G. C. Porter of Winnipeg)

Chicago.—Measured by every circumstance familiar to the government immigration agents, and representatives of Canadian railways in this section 1923 promises to be a good year for the movement of settlers from the States to Canada. All insist that the inquiries during the winter and especially for the past six months are much more numerous than for the same period a year ago.

C. J. Broughton, in charge of the Chicago office, and this section for the Dominion Government, the dean of the staff operating in the United States, told me that his personal callers and mail inquiries have been much in excess of other years this winter. The day I called he had just completed all details and issued certificates for a family of nine that was leaving for a point forty miles north of Regina. This man is carrying a car of equipment for twelve hundred and eighty acres he has purchased there outright and twelve thousand dollars in cash. He sold his farm in Illinois and is taking his entire fortune with four stalwart sons to Canada.

Cases of this sort are not unusual. In Broughton's office last year he issued certificates to 389 families going into the prairies and during his twenty odd years in the service his records will show that he has sent some fifty thousand people over the line. He is the type that makes and holds friends easily and hundreds of those he has sent northward in these years drop in on him every winter while visiting their former homes.

In this class is Rev. David Eisenbeies, a minister of the Dundard faith who sold his large holdings in Nebraska some time ago and after looking all over the United States and Canada for a farm investment, purchased a thousand acres in the Gleichen, Alberta, district. Later he was in Mr. Broughton's office and told him that he was hailed out that fall but in spite of that his grain averaged twenty-five bushels to the acre.

When I was in Broughton's office just a year ago he was completing arrangements to send an Illinois farmer and his family to a point near Arnaut, Man., between Winnipeg and Emerson. This winter, this gentleman, a Mr. Curtis, dropped in to see Broughton and told that on two hundred and fifty acres last fall which he had cropped near Arnaut, he had marketed approximately 8,000 bushels of wheat.

Average Value of Farm Land

Comparative Values of Lands for the Different Provinces

The average value of the occupied farm lands of Canada, which includes both improved and unimproved land, together with dwelling houses, barns, stables and other farm buildings, is returned as $44 per acre, as compared with $40 in 1921, $48 in 1920, $46 in 1919, $41 in 1913, $38 in 1917, $36 in 1916 and $35 in 1915. By provinces, the value for 1922 is highest in British Columbia, viz., $120. In the other provinces the average values of farm lands per acre are reported as follows: Ontario, $64; Quebec, $58; Prince Edward Island, $45; Nova Scotia, $34; New Brunswick and Manitoba, $32; Saskatchewan, $28; and Alberta, $34. The average values in 1922 of orchards and fruit lands, including buildings, etc., in the fruit growing districts of Nova Scotia, Ontario and British Columbia are estimated as follows: Nova Scotia, $93; Ontario, $127; British Columbia, $320.

Naturally

Tom.—Dearest, I've lost all my money.

Gladys.—How careless of you! The next thing you know, you'll be losing me!—Judge.

Commission Will Not Operate

Seed Grain Not to be Handled This Season

Hon. W. R. Motherwell, Minister of Agriculture, announced that the Dominion Government seed purchasing commission will not operate in the purchasing and distribution of seed grain this year.

Since the establishment of the seed purchasing commission under the Dominion Seed Branch in 1916, for the purpose of supplying seed grain at approximate cost to farmers in localities having complete or partial crop failure, steady progress has been made in the development of the trade in standard grades of seed grain, looking to the ultimate discontinuance of the operation of the seed purchasing commission, at least as a Government organization.

Seed grain will be required in some districts of Northern and Central Alberta this year, but it is believed this can be obtained locally or through private companies to as good or better advantage than through the seed purchasing commission.

Canadian Cattle In Demand Overseas

Commissioner of Agriculture for Canada Making Preliminary Arrangements

The Commissioner of Agriculture for Canada, Mr. Duncan Marshall, who is at present in England, in making preliminary arrangements for the entry of Canadian store cattle, says that a keen demand for such cattle exists in that country at the present time. Parties have interviewed him from Glasgow, Bristol, Leith, Newcastle-on-Tyne, Salford and Dundee, all anxious to have shipments made to their respective ports. The National Farmers' Union, formerly opposed to the removal of the embargo, appears to have completely reversed its attitude. Its members are now anxious to have consignments made direct to them, in order that commission charges may be avoided. A delegation of Scottish farmers told Mr. Marshall that they wanted Canadian cattle early in the spring to be fed on large stocks of turnips and mangel-wurzels that were still on hand.

A New Make of Cheese

A Product of First Quality Among Full-Flavored Cheeses

At the Central Experimental Farm, Ottawa, after a great deal of experimental work, a new cheese has been originated. It is termed Meilleur cheese, being named after the dairyman at the farm—Joseph Meilleur. While the process of manufacture cannot as yet be considered to have been perfected, states a pamphlet just issued describing the methods of making, the nature, and the qualities of the new cheese, the results that have been obtained indicate a product of the first quality among full-flavored cheeses. The pamphlet describes the cheese as presenting, when properly ripened, an attractive bright yellow color and possessing a fine texture. It is more open than Cheddar, resembling to some extent the Emmenthaler or "Swiss-hole" cheese. The characteristic odor and flavor, while being more or less pronounced, are not sufficiently marked to be objectionable, differing materially in this respect from the great majority of cheeses of this class. It is considered that when conditions and circumstances are favorable, the manufacture of milk into Meilleur cheese will prove profitable.

Stock Kept Alive On Prickly Pears

South African Agricultural School Tries Interesting Experiment

Interesting experiments of great importance to areas liable to severe drought were carried out recently by the Grootfontein School of Agriculture in South Africa to ascertain whether stock could be kept alive for lengthy periods on a ration of prickly pear leaves alone.

It was demonstrted that sheep, though they fell off in condition, could exist for 280 days solely on a diet of prickly pear, and when a small allowance of alfalfa was fed in addition after that period, the sheep were able to go for 500 days without a drop of water, depending on the moisture from the prickly pear.

Japanese English

Here is a copy of traffic rule No. 2, said to be actually used by the street cars in Tokyo:

"When a passenger of the foot heave in sight, tootle the horn trumpet to him melodiously at first. If he still obstacles your passage, tootle with angry vigor."

Refreshes Weary Eyes

MURINE For Your EYES

Clay Products Industry May Be Established In The Near Future In Saskatchewan

The attention of those interested in Canadian raw materials for clay product industries in Canada has for many years been directed to the extensive clay belt known to extend over a wide area along the Weyburn branch on the Canadian Pacific Railway in Southern Saskatchewan.

Owing to the nature of the clays in this field and their convenient situation as regards transportation, it has frequently been predicted that Saskatchewan will eventually take up an important industrial position in the Dominion based on industries utilizing clays, coals and natural gas.

Data on the Saskatchewan clay deposits has until recently been somewhat general, but steps have lately been taken to acquire more specific knowledge of the various beds, their suitability for a variety of clay products, and accurate investigations have been made with the ultimate object of placing before those interested such information as may lead to practical development.

A course at ceramics was instituted at the University of Saskatchewan to ensure a staff of experts for the future industry and a ceramic engineer secured who had a wide practical as well as theoretical experience. Private prospecting has supplemented government efforts, and today reliable information on the Saskatchewan clay deposits is so extensive and at the same time so encouraging as to warrant the closest attention from manufacturers and investors.

So far the surveys carried out by the Province's Ceramic Engineer have resulted in concentrating attention on the deposits in the Readlyn-Willows and Eastend-Ravenscrag districts, these surveys having disclosed in these territories very large deposits of commercial clays. There are present in the district clays of a wide range of physical properties which permit of close control in body mixtures. In the immediate vicinity of Eastend there are at least two large deposits, easy of inspection, from which not only tests have been made, but many carloads shipped to Medicine Hat, Alberta, and manufactured into creditable and extensive lines of crockery and stoneware for the Eastern Canadian market.

In the Readlyn-Willows district the clays have been found to be of the ball or semi-ball types burning nearly white. In some cases a creamy white burning clay was found much lighter than similar commercial clays of Great Britain and the United States. These clays should form the basis for the manufacture of such lines as granite ware, floor and wall tile, insulators and similar ware where a white body is desired. There is also to be found in this district clays of the stoneware type as well as semi-refractories suitable for screw-pipes, terra-cotta, enamelware and ordinary fire brick and stove linings. In the Eastend-Ravenscraw district the clays are of the earthenware and stoneware types, highly suited to the manufacture of Rockingham yellow ware and a wide range of stoneware, including chemical.

The establishment of an extensive clay products industry in the province of Saskatchewan in the not distant future, can be reasonably expected. Excellent clay deposits of every variety are available, with fine transportation facilities and in proximity to supplies of coal and other requisite materials for manufacture. These clays have been proven the equal of deposits anywhere, and exhaustive tests made in the ceramic laboratories of New York all gave eminently satisfactory results.

Saskatchewan is the logical home for such an industry in Canada. There is a constantly growing market for building material such as brick, tile and terra-cotta and great market possibilities for stoneware and even tableware. The province of Saskatchewan alone imports heavily of these commodities each year. The existing industry in Canada is totally inadequate to supplying domestic requirements, and in the last fiscal year the Dominion imported clay products to the extent of $10,781,592 as well as clays of various kinds to the extent of $672,782, and such importation is on the increase rather than otherwise. Certainly there is a splendid opportunity for the investment of capital in the clay-working industry in Saskatchewan.

THE EXPLANATION
Nature placed the growth-promoting "vitamins" in the oil of the cod-fish—this explains why
Scott's Emulsion
is so definite in its help to a child of any age. Latter-day science reveals that the "vitamins" are needful for normal growth.
Scott's Emulsion will help any child grow.
Scott & Bowne, Toronto, Ont. 19-7

SUN-MAID SEEDLESS RAISINS
5¢

Help You Run the Ball

—bring home the bacon, collar the blue vase, carry the message to Garcia, etc.

LITTLE Raisins, full of energy and iron, will put the pep into you that makes winning plays. Use vim like it in your business, too.

One hundred and forty-five calories of energizing nutriment in every little five-cent red box that you see.

Comes from fruit sugar in practically predigested form—levulose, the scientists call it—so it goes to work almost immediately. Rich in food-iron also.

Try these little raisins when you're hungry, lazy, tired or faint. See how they pick you up and set you on your toes.

Mrs. Bonner, who has been living with her daughter, Mrs. Frank Schram for some time past, died last Saturday. Deceased had been ill for some time. The funeral took place on Monday.

* * *

Mr. and Mrs. A. R. Ballantyne, who have been spendiny the past few months in California, returned home last Saturday. They report a most delightful trip.

* * *

Richard Wright, who has been working at Ponoka, was called to his home here owing to the serious illness of his youngest daughter. We are glad to be able to report that the child is greatly improved today.

Mr. McAdam, D.D.G.M., for this Masonic district, paid the local lodge an official visit last Tuesday evening. After the regular business of the evening a fourth degree was held during which the District Deputy gave an instructive and interesting address.

* * *

Last week we made mention of a large fancy corrugated egg laid by one of Mr. J. L. Wright's hens, especially for the Easter occasion, but only today we discovered that the egg was more wonderful than we had supposed. In handling it we accidently broke the big shell, and to our surprise found inside another perfectly formed egg with shell complete. J. L.'s hen certainly went the limit, 1. yanks the bun for this season's competition.

Rev. D. Hollinger was in Calgary all last week attending a meeting of the Brethren committee to make arrangements for the big convention to be held in that city this coming summer. Mr. Hollinger reports that good progress was made and all arrangements completed for the housing and feeding of the delegates. He thinks that the attendance will be much larger than was at first estimated. Railroad and government officials are rendering every possible assistance to help make the convention a success.

Getting Ready for Big Brethern Convention

J. E. Proctor, district passenger agent of the Canadian Pacific railway Wednesday estimated approximately 3,000 and 5,000 delegates to the convention of the Church of the Brethren will come from Chicago and points east. It is estimated that between 500 and 600 will come from California, so that it is possible that there may be 10,000 persons at the gathering.

Last year at the Winona Lake convention there was an attendance of 20,000; and when the convention was held in Pennsylvania, where the churc his strongest, there were present 50,000, including visitors.

Bishop Albert Hollinger, of Kindersley, Sask.; Bishop David Hollinger, of Redcliff, and Bishop T. A. Eisenbise of Gleichen, the committee on arrangements, met Mayor George H. Webster and J. M. Miller of Calgary, and went over plans for the convention.

The delegates will stay at private homes, rooming houses and hotels, and some who come by motor will be taken care of, if they wish, in an auto camp. Cafeteria meals will be served on the grounds at Victoria park. The catering will be done by contract.

Plans for the accommodation of this convention are on an elaborate scale. As a great many delegates will come by automobile, this will mean much to the garage men of the city. A post office will have to be established on the grounds and the telegraph companies will be asked to supply operators for the convenience of the delegates.

Rev. J. E. Miller, who was here last fall ,is writing a number of articles in the young people's paper, and Rev. W. O. Beckner, who was here last week, will write more in the denominational paper with the aim of increasing .the delegation.
